OVERVIEW OF INDUSTRY

The Indian Sugar Industry, based on production data, is estimated at 31,964 thousand tonnes in FY 2024 and is projected to reach 34,678 thousand tonnes by FY 2033 registering a modest CAGR of 0.82% over the period. The production trend has remained relatively stable in recent years, fluctuating between 31,000–36,000 thousand tonnes, highlighting the cyclical nature of sugarcane cultivation and the stabilizing impact of policy interventions. On the demand side, population growth, rising consumption in processed foods and beverages, and continued household use underpin steady domestic demand for sugar.

The Indian non-alcoholic beverage industry, valued at USD 23.51 billion in 2024, is projected to nearly double to USD 46.06 billion by 2033, reflecting a healthy CAGR of 7.76%. This growth highlights the rising consumer shift towards diverse, branded, and healthier beverage options, driven by increasing disposable incomes, rapid urbanization, and wider distribution through both traditional and modern trade channels. The steady CAGR also signals strong underlying demand resilience, positioning the sector as a key contributor to India’s fast-moving consumer goods (FMCG) market expansion over the coming decade.

INTERNAL RISK RELATED TO OUR BUSINESS

1. We derive the majority of our revenue from distribution and trading of sugar, and therefore vulnerable to a range of risks associated with the sugar industry.

The majority of our revenue is generated from distribution and trading of agricultural commodities, with a primary focus on sugar. During the Financial Year ended on March 31, 2025, March 31, 2024, and March 31, 2023, we derived ₹30,052.49 lakhs, ₹22,647.77 lakhs, and ₹ 10,019.62 lakhs from trading of sugar, constituting 99.78%, 97.19%, and 97.02% respectively of our revenue from operations. The aforementioned concentration of our revenue from sugar, renders us particularly vulnerable to a range of risks and challenges that are distinctive to the sugar industry.

The following table set forth the information on our product portfolio in terms of revenue contributions for the financial year ended March 31, 2025, March 31, 2024, and March 31, 2023:

Since a significant portion of our revenue is derived from sugar, our business is inherently exposed to risks associated with the sugar industry as a whole. As per Infomerics Analytics & Research's Report, the certain key aspects influence the operation of sugar industry, some of which are as follows:

- **Volatility in sugarcane prices and farmer arrears** - Sugarcane prices account for a major portion of production costs. Fluctuations in SAP (State-Advised Prices) and FRP (Fair & Remunerative Prices) often create mismatches with sugar realizations, leading to delayed farmer payments and arrears. While government intervention provides temporary relief, the issue remains a persistent structural challenge.
- **Overdependence on monsoon and climatic conditions** - Sugarcane is a water-intensive crop, making the industry highly dependent on monsoon rains. Erratic rainfall, droughts, or excessive floods can severely affect cane yields and disrupt supply. Climate change has amplified these risks, with rising temperatures and shifting weather patterns impacting both productivity and quality. Unlike some other crops, sugarcane has limited flexibility in terms of crop cycles, which makes weather dependency a persistent long-term challenge.

- **Regulatory and policy uncertainty (export bans, subsidies)** - The sugar industry is one of the most regulated sectors in India. Government interventions, such as export bans, export subsidies, stock limits, and price controls, significantly influence profitability. For example, sudden restrictions on exports to stabilize domestic supply often hurt mills that rely on overseas markets. Similarly, ethanol pricing policies, blending mandates, and subsidy structures are frequently revised, creating uncertainty for long-term planning and investment.
- **Global price fluctuations and trade barriers** - Global sugar markets are highly volatile, influenced by supply-demand dynamics in major producing countries like Brazil, Thailand, and Australia. Indian sugar exports are thus vulnerable to international price swings and trade barriers. Subsidy disputes at the WTO, tariff changes by importing nations, and competition from low-cost producers further add to uncertainties in export-led growth. While India benefits from surplus production in some years, it faces risks when global prices fall below domestic costs of production.
- **Health concerns and shift toward alternatives** - Growing awareness about health issues such as obesity, diabetes, and cardiovascular diseases has led to increasing scrutiny of sugar consumption. Both consumers and policymakers are pushing for reduced sugar intake, resulting in rising demand for alternatives like jaggery, stevia, organic sugar, and low-calorie sweeteners. This trend, while gradual, poses a long-term restraint on refined sugar demand, particularly in urban and health-conscious consumer segments. At the same time, taxation on sugary beverages (as seen globally with “sugar taxes”) could further curb demand in downstream industries like soft drinks and confectionery.

Furthermore, operational risks such as transportation and storage challenges, including delays, quality degradation, or pilferage, can result in additional costs and financial losses. Supply chain disruptions due to natural calamities, geopolitical tensions, or other unforeseen events also pose significant risks to our business.

Given our reliance on sugar for a majority of our revenue, any adverse developments to the sugar industry may expose us to operational risks which, if realized, could adversely impact our business, results of operations, and financial condition. While we continue to explore measures to mitigate these risks, including diversifying procurement sources and improving supply chain efficiency, there can be no assurance that these measures will be sufficient to address potential challenges effectively.

2. **Our revenue from operations has significantly increased from Rs. 10,327.13 Lakhs in FY 2022-23 to Rs. 23,302.48 Lakhs in FY 2023-24 resulting in growth of over 100% (YOY). Similarly, our revenue from operations has further increased from Rs. 23,302.48 Lakhs in FY 2023-24 to Rs. 30,118.67 Lakhs in FY 2024-25 leading to growth of 29.25% (YOY). If we are unable to sustain or manage our growth rate our business operations and results of operations may be adversely affected, and this rate of growth may not be achievable in the future.**

We have experienced substantial growth in our revenue from operations over the past two financial years. For the year ended March 31, 2024, our revenue from operations increased by 125.64% to ₹23,302.48 Lakhs from ₹10,327.13 Lakhs in FY 2022-23, primarily due to a strategic shift from export-led sales to a stronger focus on the domestic market, including the appointment of super-stockists and distributors across multiple states. In FY 2024-25, our revenue from operations further grew by 29.25% to ₹30,118.67 Lakhs, driven mainly by continued expansion in our domestic sugar business, strengthening of our distribution network, deeper market penetration, improved supplier relationships, and enhanced liquidity supported by an improved net worth.

While this growth reflects positively on our operations and market positioning, such rapid and consistent growth may not be sustainable in future periods. There is no assurance that we will be able to maintain our

current growth trajectory, or continue to grow at similar rates. Our future growth depends on several factors, many of which are beyond our control, including consumer demand, competitive dynamics, macroeconomic conditions, supplier reliability, raw material availability, and regulatory changes.

Failure to effectively manage this growth, or any slowdown or decline in our revenue, could adversely impact our operational efficiency, strain our infrastructure and distribution capabilities, affect our working capital requirements, and negatively influence our profitability. Furthermore, if we are unable to replicate the strategic and operational initiatives that have contributed to our past performance, or if those initiatives cease to be effective, our business, financial condition, and results of operations may be materially and adversely affected.

3. Our Profit After Tax has significantly increased in recent financial years. If we are unable to sustain or improve our profitability, our business, financial condition and results of operations may be adversely affected.

Our Restated Profit After Tax increased to ₹1,636.10 Lakhs in the financial year ended March 31, 2025 from ₹1,267.31 Lakhs in the previous year, representing a growth of 29.10%. This improvement was primarily driven by increased operating revenues, supported by higher sales volumes and better utilization of available liquidity. For the financial year ended March 31, 2024, our Restated Profit After Tax was ₹1,267.31 Lakhs, compared to ₹451.03 Lakhs in FY 2022-23, reflecting a significant growth primarily due to improved gross margins resulting from increased domestic sales volumes.

While this growth in profitability demonstrates our operational progress and the positive impact of our strategic initiatives, there can be no assurance that we will be able to sustain or further improve our profitability in the future. Our ability to maintain or grow profitability is subject to various internal and external factors including our ability to continue increasing revenues, managing costs and operating expenses efficiently, maintaining stable gross margins, and responding effectively to changes in market demand, pricing pressures, competitive intensity, supply chain disruptions, and macroeconomic conditions.

Any adverse developments in these areas, or failure to manage them effectively, could result in reduced margins, lower profitability, or even losses in future periods. Consequently, our business, financial condition, cash flows, and results of operations may be materially and adversely affected.

4. We are dependent upon a limited number of suppliers for our agro-commodities. Any failure of our suppliers to deliver these agro-commodities in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards and technical specifications may adversely affect our business and our ability to deliver orders on time at the desired level of quality.

We source our agro-commodities such as sugar, rice, pulses and milk powder from third-party suppliers located across India under our own brand name. We do not manufacture these products in-house. Our reliance on external suppliers is significant and concentrated. Purchases from our top five suppliers for the Financial Years ended March 31, 2025, March 31, 2024, and March 31, 2023 constituted 65.64%, 88.54%, and 97.03%, respectively, of our total purchases. Purchases from our top ten suppliers accounted for 81.89%, 97.71%, and 97.97 %, respectively, for the same Financial Years.

We may find additional suppliers to supply these agro-commodities, any failure of our suppliers to deliver these agro-commodities in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards and technical specifications may adversely affect our business and our ability to deliver orders on time at the desired level of quality. However, till date, there have been no instances of delay or default by any of our suppliers in relation to the supply of agro-commodities, including with respect to delivery timelines, quality parameters, credit terms, or other obligations. We fulfil purchase orders by procuring agro-commodities from suppliers and routing them through our super stockist to distributors or

directly to distributors. Inadequate or delayed supply may impair our ability to fulfil committed orders, disrupt our distribution network, and materially impact our business operations and financial results.

Further our agro-commodity supply and pricing may become volatile due to several factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Therefore, we cannot assure that we will be able to procure adequate supplies of our products in the future, as and when we need them on commercially acceptable terms. Further, there can be no assurance that we will be able to effectively manage relationships with our existing or new suppliers or that we will be able to enter into arrangements with new suppliers at attractive terms or at all. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

5. Non-payment and procedural non-compliance in relation to stamp duty on certain instruments executed by the Company may subject us to penalties or other regulatory actions.

The Company has not paid stamp duty on certain gift deeds executed, for details refer to chapter titled “*Capital Structure*” beginning on page no. 87, which is required to be paid under Maharashtra Stamp Act, 1958. Non-payment of stamp duty on such instruments may attract penalties or other consequences in accordance with the applicable provisions of the Maharashtra Stamp Act, 1958 (“**Maharashtra Stamp Act**”).

Further, with respect to share transfer deeds, while the Company has paid the applicable stamp duty along with penalty for earlier non-payment of stamp duty, the payment was not made through formal adjudication by the Collector of Stamps under Section 31 of the Maharashtra Stamp Act. Although we believe that the stamp duty and penalty have been adequately paid, the absence of adjudication may be viewed as a procedural non-compliance, and there can be no assurance that no adverse action will be taken by the relevant authorities in this regard.

Any future proceedings or penalties arising from such non-payment or procedural lapses could adversely affect our financial condition or result in reputational risk, although we believe the overall exposure in this regard is not material.

6. We are dependent on third party manufacturers for manufacturing the beverages, and any disruption in these arrangements could materially and adversely affect our business operations, results of operations, and financial condition.

We have entered into agreements with Bee Ventures for manufacturing carbonated beverages and Pure Foods and Beverages for manufacturing the fruit-based beverages. These products are manufactured at their respective facilities, strictly in accordance with our product specifications. As we do not own or operate any manufacturing facilities, we are substantially dependent on these third party manufacturers for the production, packing and timely delivery of these products. In Fiscal 2024 and 2025, the sale of the carbonated beverages manufactured by Bee Ventures represented 0.02 % and 0.09 % of our total sales, respectively.

Any interruption or delay in the manufacturing activities of “Bee Ventures” and “Pure Foods and Beverages”, whether due to operational issues, raw material shortages, labour disputes, regulatory actions, quality control failures, natural disasters, or other unforeseen circumstances, could impact our ability to fulfil customer orders. Additionally, any deviation from agreed specifications or quality standards by these third party manufacturers may damage our brand reputation and lead to customer dissatisfaction or liability.

Further, any increase in manufacturing costs due to higher input prices, labour shortages, regulatory changes, or inflation may be passed on to us by our third party manufacturers. Our ability to absorb or pass on such cost increases may be limited by market dynamics and customer pricing expectations, which could adversely affect our margins. Given our dependence on third party manufacturers and the absence of binding long-term contracts, any disruption in supply or adverse change in terms could materially and adversely impact our business, financial condition, and results of operations.

While we maintain ongoing oversight and quality checks, we cannot assure that such third party manufacturers will always comply with our standards or contractual obligations. The termination or non-renewal of our agreements with these third party manufacturers, or any material changes in the terms of our arrangements, could adversely affect our supply chain and overall business operations. In such circumstances, if we are unable to find a suitable replacement of another third party manufacturers in the same region or are unable to enter into new third party manufacturing agreements at favourable terms or at all, there can be no assurance that we will be able to ensure timely supply of products to markets, we may lose market share in such regions, which could adversely impact our business prospects and financial performance.

7. We derive 89.58%, 88.92% and 99.67% of our revenue from our top 10 key customers Financial Years ended on March 31, 2025, 2024 and 2023 respectively.

We have developed long- standing relationships with certain key customers i.e. super stockists and distributors. Accordingly, we are dependent on our arrangements with such customers, and our business depends on the continuity of our relationship with them. The majority of our revenue is derived from our top 10 and top 5 customers. The contribution to the revenue from operations of our Company by our top ten and top five customers, is as set out below:

(Rs. In Lakhs)

Customers	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	Revenue (in Lakhs)	% of Total Revenue from Operations	Revenue (in Lakhs)	% of Total Revenue from Operations	Revenue (in Lakhs)	% of Total Revenue from Operations
Top five*	22,007.55	73.07	15,844.49	67.99	10,286.14	99.61
Top ten*	26,979.09	89.58	20,721.54	88.92	10,293.33	99.67

**In order to maintain customer confidentiality, the customers have not provided consent for disclosure of their name in the DRHP.*

Since we largely depend on certain key customers for a significant portion of our revenue, the loss of any of our key customers or a significant reduction in demand from such customers could have a material adverse effect on our business, financial conditions, results of operations and cash flows.

We might face the risk of the loss of all or any of our customers who engage our products, including on account of delays on our part with respect to fulfilment of orders, quality issues, or inadequate supply against demand. If such instances occur frequently, it could result in: (i) failure to generate new sales contracts with one or more of our significant customers, and (ii) failure to renegotiate favourable terms with our key customers, all of which could have an adverse effect on our business, financial condition, results of operations, and cash flows. Our reliance on a limited number of customers may also constrain our pricing flexibility and overall financial performance. The deterioration of the financial condition or business prospects of these customers could reduce their purchase volume and result in a significant decrease in the revenue that we derive from such customers.

We cannot assure you that we will be able maintain historic levels of business from our significant customers, or that we will be able to significantly reduce concentration in the future. Additionally, our revenues may be

adversely affected if there is an adverse change in any of our customers' procurement strategies or a reduction in their engagement of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers. Maintaining strong relationships with our customers is, therefore, essential to our business strategy and to the growth of our business.

Further, while we have not experienced any such loss of key customers in the past, since our business is presently concentrated among a few significant customers, we may also experience reduction in cash flows and liquidity if we lose one or more of our top customers due to any dispute. Additionally, the loss of any key customers may significantly affect our revenues, and we may have difficulty securing comparable levels of business from other customers or may not be able to secure new customers in a timely manner or at all to offset any loss of revenue from the loss of any of our key customers. We may also not be able to easily re-allocate our resources and assets in a timely or an efficient manner. Additionally, in order to retain some of our significant customers we may also be required to offer terms to them which may place restraints on our resources and reduce our profitability.

8. Failure to timely obtain registration under the Employees' Provident Funds and Miscellaneous Provisions Act, 1952 ("EPF Act") and non-compliance with the Payment of Bonus Act, 1965 ("Bonus Act") may expose us to penalties and regulatory actions.

Under the EPF Act, companies are mandatorily required to obtain registration upon reaching the threshold of 20 (twenty) employees. Our Company crossed these statutory thresholds on July 2022 (for EPF Act) however the Company obtained the requisite registrations under the said Act on January 12, 2023. This delay between attaining the statutory thresholds and obtaining registrations has resulted in an extended period of non-compliance under the said Act. While we have now obtained the requisite registration, we may be subject to penalties, prosecution, and regulatory actions for the non-compliance. Under the EPF Act, penalties may include imprisonment and monetary fines, along with payment of accumulated interest and damages on the outstanding dues. Our Promoters and Directors may also face personal liability for such non-compliance. We may need to make significant one-time payments to address these historical dues along with penalties, which could adversely impact our cash flows and profitability. Any adverse action by these authorities could materially and adversely affect our business, financial condition, reputation, and results of operations.

Our Company has not complied with the payment and filing requirements of the Bonus Act and the Payment of Bonus Rules, 1975 ("**Bonus Rules**") for the Financial Years prior to FY 2023–24. We have not paid, therefore have not maintained records, including Form C (Register of Bonus), or filed the requisite returns with the relevant authorities for eligible employees for these periods. Therefore, for non-compliance of the provisions of Bonus Act and Bonus Rules, in previous years, our Company may be subjected to penalty under Section 28 of the Bonus Act. However, during the Financial Year 2023–24, we paid bonus to our employees and the requisite statutory filings and compliances in this regard were duly made in accordance with Bonus Act and Bonus Rules. Any adverse action, inquiry, or penalty could materially affect our business, financial condition, results of operations, and prospects.

9. Instances of delays in payment of employee-related statutory dues in the past may expose us to regulatory action, including imposition of penalties.

Our Company has, in the past, experienced certain delays in remitting statutory dues, including contributions towards provident fund, employee state insurance and TDS within the timelines prescribed under applicable laws. While all such dues have subsequently been paid and there has been no continuing default or forfeiture, such delays may be construed as non-compliance with applicable statutory requirements. As on the date of this Draft Red Herring Prospectus, no regulatory proceedings have been initiated against us in this regard. However, there can be no assurance that the relevant authorities will not initiate inquiries or proceedings or impose penalties for such past delays, which may result in financial impact on our Company.

Our Company has had instances of delays in the payment of statutory dues with respect to Provident Fund, Income Tax (TDS on Salary), and Employee State Insurance. The details of such delays are as follows:

(Rs. in Lakhs)*

Particulars	FY 2024-25		FY 2023-24		FY 2022-23	
	No. of instances	Amount delayed	No. of instances	Amount delayed	No. of instances	Amount delayed
EPF Act, 1952	1	0.74	-	-	6	0.75
ESI Act, 1948	2	0.13	-	-	1	0.6
Income Tax (TDS on Salary)	1	0.0063	-	-	-	-

* Amount are rounded off to the nearest lakh

We cannot assure you that going forward we will be able to make payment of our statutory dues in a timely manner or at all, which could result in penal or other regulatory action including payment of interest on the delay in payment of statutory dues, which could adversely affect our business and our results of operations and financial condition.

10. We have had negative cash flows in the past. Sustained negative cash flow could adversely impact our business, financial condition, and results of operations.

We have experienced negative cash flows from operating activities, financing activities and investing activities and may, in the future, experience negative cash flows. The following table sets forth certain information relating to our cash flows for the year indicated below:

(Rs. In Lakhs)

Particulars	For the Financial Year ended on		
	March 31, 2025	March 31, 2024	March 31, 2023
Net cash flow from / (used in) operating activities	189.58	819.85	(208.47)
Net cash flow from / (used in) investing activities	183.08	(344.94)	38.24
Net cash flow from / (used in) financing activities	(0.64)	(3.59)	746.87

For further information, see “*Restated Financial Statements*” beginning on page 217.

Negative cash flows over extended year, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our business, financial condition and results of operations could be materially and adversely affected.

11. Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

Our business is working capital intensive and requires a significant amount of working capital for smooth functioning. The incremental and proposed working capital requirements and key assumptions with respect to the determination of the same based on Restated Financial Statements and has been disclosed in the chapter titled “*Objects of the Offer*” beginning on page no. 103 of this DRHP.

We intend to continue growing by expanding our business operations. The results of operations of our business are dependent on our ability to effectively manage our incremental working capital requirements. We estimate our revenue based on the forecast, demand and requirements and also on the customer specifications. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability. Our growing scale and expansion, if any,

may result in increase in the quantum of working capital. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. However, we have managed our working capital and funding requirements effectively in the past and have not experienced any instance of cash flow shortage, default in debt servicing, or inability to meet our working capital needs till date. For further details regarding working capital requirement, please refer to the chapters titled “*Objects of the Offer*” and “*Management Discussion and Analysis of Financial Condition and Results of Operation*” beginning on pages 103 and 260, respectively, of this Draft Red Herring Prospectus.

12. We have not entered into formal agreements with our super stockists and distributors, which may affect our ability to enforce terms and ensure continued business relationships.

Our Company currently operates without executing formal agreements with our super stockists and distributors. These parties play a critical role in ensuring the distribution and availability of our products in the market. The absence of written agreements limits our ability to enforce specific commercial terms, including pricing, territory restrictions, payment terms, termination conditions, and dispute resolution mechanisms.

This informal arrangement exposes us to certain risks, including the risk of sudden termination of relationships, non-adherence to payment timelines, deviation from agreed sales practices, or the inability to legally enforce performance obligations. If any of our super stockists and distributors discontinue their relationship with us without notice or act in a manner inconsistent with business practices, it could lead to disruption in our supply chain, affect product availability in certain regions, and adversely impact our revenues and profitability.

Further, the lack of formal agreements may also hinder our ability to expand or manage our distribution network in a structured and efficient manner. This could limit our operational scalability and potentially affect our growth prospects. Any disruption or deterioration in our relationships with our existing super stockists and distributors may materially and adversely affect our business operations, financial condition, cash flows, and results of operations.

13. Our proposed acquisition of leasehold plots together with warehouses constructed thereon, which is one of the Objects of the Offer, is subject to fulfilment of certain conditions, and failure to consummate the acquisition may adversely affect our ability to utilise the Offer Proceeds as intended.

Our Company proposes to utilise Rs.1,020.00 lakhs from the Net Proceeds towards funding the acquisition of leasehold plots situated at Plot Nos. 532 to 544, Shree Shahu Market Yard, Kolhapur, Maharashtra, together with four warehouses constructed thereon (the “**Property**”), as more fully described in the chapter “Objects of the Offer”. The acquisition is subject to the fulfilment of certain conditions under the memorandum of understanding entered into with the sellers, including, inter alia, (i) obtaining prior consent/no-objection certificate from Kolhapur Sheti Utpann Bazar Samiti and other statutory authorities, (ii) clearance of statutory dues, lease rentals, taxes and outgoings up to the date of handover, and (iii) execution and registration of the sale deed in favour of our Company.

There can be no assurance that these conditions will be satisfied in a timely manner, or at all. Any delay, non-fulfilment or dispute in relation to the acquisition may result in termination of the transaction, forfeiture of the earnest money already paid, and/or require reallocation or delayed utilisation of the Offer Proceeds. Such events may adversely affect our expansion, business operations, financial condition and prospects.

14. An inability to expand or effectively manage our growing super stockist and distributor network, or any disruptions in our distribution chain may have an adverse effect on our business prospects and financial performance.

Our business is significantly dependent on our distribution network comprising of super stockists and distributors, who distribute our products to end retailers and wholesalers. Any disputes with our super stockists and distributors, including disputes regarding pricing or performance, could adversely affect our ability to supply products to the end retailers and wholesalers and consequently our customers and could materially and adversely affect our product sales, financial condition, and results of operations. In addition, any damage or disruption to our supply chain, including third-party manufacturing or transportation and distribution capabilities, due to weather, natural disaster, fire or explosion, terrorism, pandemics, strikes, government action, or other reasons beyond our control or the control of our super stockists and distributors, could impair our ability to sell our products. Failure to take adequate steps to mitigate the likelihood or potential impact of such events or to effectively manage such events if they occur could adversely affect our business or financial results.

As we rely on our super stockists and distributors for our sales, any one of the following events could adversely impact or result in a decrease in our sale of products and consequently impact our financial performance:

- (i) failure to negotiate arrangements with our super-stockists and distributors on favourable terms;
- (ii) failure to maintain relationships with our existing super stockists and distributors;
- (iii) failure to establish relationships with new super stockists and direct distributors, on favourable terms or at all;
- (iv) inability to timely identify and appoint additional or replacement super stockists or distributors on loss of one or more of our super stockists or distributors;
- (v) reduction, delay or cancellation of orders from our super stockists and/or distributors; and
- (vi) disruption in delivery of our products by our super stockists and/or distributors.

We may not be able to compete successfully against larger and better-funded distribution networks of some of our current or future competitors. If the terms offered to such super stockists and/or distributors by our competitors are more favourable than those offered by us or our super stockists and/or distributors, our super stockists and/or distributors may decline to distribute our products and terminate their arrangements with us or the relevant super stockist and/or distributor. We cannot assure you that we will not lose any of our super stockists and/or distributors to our competitors, which would result in losing some or all of our favourable arrangements with such super stockists and/or distributors and may result in the termination of our relationships with such super stockists and/or distributors.

- 15. We do not own any premises, including our registered office and warehouses and rely exclusively on leave and license agreements for these locations. In the event we lose such rights or are required to negotiate it, our cash flows, business, financial conditions and results of operations could be adversely affected.**

Our Company has entered into leave and license agreements in relation to registered office and warehouses. For further details, please see chapter titled “*Our Business*” beginning on page 148 of the DRHP. Any of these leave and license agreements can be terminated, and any such termination could result in any of these warehouses or office being shifted. There can be no assurance that we will, in the future, be able to retain, renew or extend the tenure for the existing locations on same or similar terms, or will be able to find alternate locations for these warehouses or office on similar terms favourable to us, in time or at all. Accordingly, we may experience business disruption, and this may materially and adversely affect our business, financial condition and result of operations.

- 16. Since Company is engaged in business of trading of agro commodities, our Company is dependent on continuous availability, quality of agro commodities and fluctuations in agro commodities pricing including the taxes and levies on the agro commodities, could have adverse impact on our Company’s business, financial condition and profitability.**

Our major products include agro based products, sugar, pulses, rice, milk products. The timely availability, cost and quality of any of these products being supplied to us plays an important role in building strong foundation for our business operations. If any disruption is there in either of the factors mentioned above which are not under our control, including general economic conditions, competition, production levels, transportation costs, Minimum Indicative Export Quotas (MIEQ), government taxes and levies, and import-export duties and if, for any reason, our regular/primary suppliers refuse or delay or discontinue the delivery of all or certain products to us in the quantities we need and at prices that are competitive, our ability to meet our order requirements shall come to a temporary standstill and our delivery schedules could be disrupted, and we may not be able to complete and execute our projects as per schedule or at estimated costs.

17. Our Company has made incorrect disclosures in past statutory filings, including showing members of the Promoter Group as Promoters, which may expose us to regulatory scrutiny.

Our Company has, in the past, made erroneous disclosures in its statutory filing of Form MGT-7 (Annual Return), our Company has disclosed 7 Promoters, whereas only 3 persons qualify as Promoters under applicable law. The additional 4, who are members of the Promoter Group, were incorrectly shown as Promoters.

However, such errors do not require any corrective adjustment in the Restated Financial Statements. Such inaccuracies in statutory filings may be construed as non-compliance with the requirements of the Companies Act, 2013 and rules made thereunder, and may invite scrutiny, clarifications, or directions from the Registrar of Companies or other regulatory authorities. While our Company may take corrective steps, there can be no assurance that no adverse action will be initiated in the future.

Further, our Company has filed Form MGT-14 dated June 21, 2025, in respect of the resolution passed for increase in authorised share capital from Rs. 11,00,00,000/- to Rs. 20,00,00,000/-. However, the attachment uploaded with the said form was incorrect. Further, in Form INC-33 filed in connection with the said change in authorised share capital, no attachment was uploaded. Such errors and omissions in our corporate filings may be regarded as non-compliances with the provisions of the Companies Act, 2013 and rules framed thereunder.

Further, such errors in filings may raise concerns regarding the accuracy and reliability of our disclosures and corporate governance practices. Any adverse regulatory finding or penalty, even if not material to our operations, may negatively impact investor confidence, damage our reputation, and adversely affect our ability to raise capital in the future.

18. Certain entities have not been disclosed in the Income Tax Returns of our Promoter and members of our Promoter Group, which may lead to potential scrutiny and could adversely affect investor perception.

Certain entities associated with our Promoter and Promoter Group have not been disclosed in their respective income tax returns ("*ITRs*"). Specifically, investment of Mr. Saurabh Malhotra in Prosperity Real Estate Solutions Private Limited and Sukriti Trading Limited are not reflected in the ITR of Mr. Saurabh Malhotra. Similarly, the investment of Ms. Kusum Chander Mohan Malhotra in C K K Retail Mart Limited, Sukriti Trading Limited, and G M K System and Logistics Private Limited are not mentioned in the ITR of Ms. Kusum Chander Mohan Malhotra and investment of Ms. Vanitha Malhotra in C K K Retail Mart Limited and Sukriti Trading Limited are not disclosed in the ITR of Ms. Vanitha Malhotra.

While the Promoter and Promoter Group have represented that all applicable taxes have been duly paid and there is no intention to evade any regulatory or tax obligations, such non-disclosure in the ITRs may attract scrutiny, inquiries, or clarification requests from income tax authorities or other regulatory bodies in the future. Any such proceedings, if initiated, may require the Promoter and Promoter Group to provide

additional information or documentation, and may lead to administrative burdens, costs, and delays. Although the Company believes that these matters will not have a material adverse effect on its operations, financial condition, or prospects, any adverse observation or enforcement action in this regard could have an indirect impact on investor confidence and the reputation of the Company.

19. There are discrepancies in the records relating to our Promoter and Directors across different documents, which may result in regulatory challenges.

Certain discrepancies have been observed in the personal details (including the names of the parents) of our Promoters and Directors as appearing across their KYC documents and statutory records filed with the Registrar of Companies, Mumbai.

The father's name of Mr. Saurabh Malhotra, one of our Promoters and Non-Executive Director, is recorded as "Chandermohan Malhotra" in his PAN Card and DIR-12 filed with the RoC, whereas in his Aadhaar Card it appears as "Chander Mohan". In the case of Ms. Arpita Dilip Tari, one of our Directors, her father's name is recorded as "Dilip Tari" in her Aadhaar Card, while in her PAN Card name of her husband has been recorded "Anant Dinkar Pange". Similarly, in the case of our Directors Ms. Neha Vohra, her father's name is recorded as "Jagan nath Vohra" in her PAN Card and DIR-12 filed with the RoC, whereas in her Aadhaar Card it is recorded as "Jagannath Vohra". Further, there are discrepancies in the records relating to Ms. Hiral Jayeshkumar Shah, our Managing Director, in her PAN, father's name is "Jayeshkumar Maneklal Shah" whereas in Aadhar Card and DIR-12, father's name is "Jayeshkumar Shah".

Such inconsistencies may result in procedural difficulties in relation to statutory filings, KYC verifications, or compliances with regulatory authorities, banks and financial institutions. Further, the existence of unrectified discrepancies may subject our Promoters and Directors to additional scrutiny. There can be no assurance that these discrepancies will not result in regulatory challenges, increased compliance requirements, or reputational concerns, any of which may adversely affect our business, operations and prospects.

20. Mr. Kuntal Jitendra Dave has been a director in certain companies that have been struck off by the Registrar of Companies, and we have not disclosed all such entities due to lack of documentary records. Any adverse findings in this regard may affect the accuracy of our disclosures and expose us to regulatory or reputational risks.

Based on publicly available information from the Ministry of Corporate Affairs ("MCA") website, which is generally considered a reliable source of corporate records, we have identified that our Independent Director, Mr. Kuntal Jitendra Dave, held directorships in certain companies that have been struck off by the Registrar of Companies under applicable provisions of the Companies Act. However, we do not possess any documentary evidence or official filings in relation to companies namely (i) Pamor Advisory Services Private Limited, (ii) Assertive Investment Advisors Private Limited, (iii) Touch Base Capital Private Limited, (iv) Touch Base Financial Services Private Limited and (v) Touch Base Consulting Private Limited, including the reasons of their strike-off. As a result, such entities have not been disclosed in this Draft Red Herring Prospectus.

While we have relied on the MCA database for identifying past directorships, in the absence of documentary proof, we cannot independently verify the full details or compliance history of these entities. Any adverse interpretation by regulatory authorities or third parties in relation to the non-disclosure of such companies, or concerns regarding the completeness or accuracy of our disclosures, may subject us to regulatory scrutiny, reputational harm, or may impact investor confidence. Further, if any liabilities or non-compliances of such struck-off entities are subsequently identified, the same could have an adverse effect on our reputation, corporate governance standards, or on the outcome of this Offer.

21. Acceptance of our recently launched products among consumers may not be as high as we anticipate which may limit our ability to strengthen our brands and have an adverse effect on our business, financial condition and results of operations.

As part of our growth strategy, we launched a new beverage in 2025 in the name of Fruitzzz Up!, aimed at catering to evolving consumer preferences and expanding our presence in the beverages segment. However, the success of newly launched products is subject to significant uncertainty and depends on various external and internal factors. There can be no assurance that the new product will be accepted by our target consumers or that it will achieve the desired market penetration or commercial success. The performance of our beverage depends on our ability to effectively position the product in the market, ensure competitive pricing, meet consumer expectations in terms of taste and quality, and maintain consistent availability through our distribution network. Additionally, changing consumer preferences such as increased demand for 100% juice content or low-sugar beverages may not align with the formulation or positioning of our offering.

Further, the beverage industry is highly competitive, with numerous established domestic and multinational brands offering a wide range of fruit drinks and juices. Differentiating our product and building consumer loyalty amidst such competition poses a significant challenge. In the event that demand for the newly launched fruit drink does not meet our expectations, we may not be able to recover the related marketing, promotional, and supply chain investments. Additionally, excess inventory, low off take, or underutilisation of production capacity by our third-party manufacturers could adversely affect our operational efficiency. Any lack of consumer acceptance or failure to achieve expected sales volumes may restrict our ability to strengthen our brand in the beverage segment and may adversely impact our business growth, financial condition, and results of operations.

22. Non-availability of death certificate of a member of the Promoter Group may affect regulatory compliance and create potential legal uncertainties.

Our Company does not currently possess the death certificates of certain members of our Promoter Group, namely Late Gurdasram Khosla, Late Satyavati Khosla, Late Ayaram Malhotra, Late Ram Piyari Malhotra, and Late Brij Mohan Malhotra, relatives of our Promoter, Ms. Kusum Chander Mohan Malhotra.

While these members do not hold any shares in the Company, the absence of such documentation may create potential challenges or uncertainties in the future. Although the absence of these death certificates does not currently constitute a legal non-compliance, it may, in certain circumstances, lead to delays or complications in administrative, operational, or legal processes. Any such challenges could indirectly affect the Company's corporate governance perception and investor confidence.

23. Our products are semi-perishable in nature and the shelf life of our products ranges from 4-24 months. Inaccurate demand forecasting for our semi-perishable product can result in excess inventory and waste which, in turn, could have an adverse effect on our business, financial condition, results of operations and cash flows.

Our Company deals in sale of agro-commodities and beverages, both of which have limited shelf lives and are subject to expiry depending on storage conditions and packaging. Specifically, beverages typically have a shelf life of 4 months, while agro-commodities may range from 6 to 24 months, depending on moisture content, storage, and packaging integrity.

Given the semi-perishable nature of these products, accurate demand forecasting and inventory turnover are critical to avoid accumulation of expired or unsaleable stock. Any overestimation of demand could result in excess inventory, leading to wastage, write-offs, and increased storage and disposal costs. On the other hand, underestimation of demand may result in stockouts and missed sales opportunities, particularly during seasonal or high-demand periods.

While we have not experienced any material adverse effects on account of these factors during the last three financial years, there can be no assurance that such risks will not arise in the future. Any failure to forecast demand accurately or to manage inventory in line with shelf-life limitations could have a material adverse effect on our business, financial condition, results of operations, cash flows, and reputation.

24. Our Company and our Group Company, Sakuma Exports Limited, share the same main objects, which may lead to potential conflicts of interest and could adversely impact our business operations.

Our Company and our Group Company, Sakuma Exports Limited, have similar main object. Although we currently conduct our operations independently, the similarity in business activities may give rise to potential conflicts of interest in the future, particularly in relation to competition for customers, suppliers, business opportunities, or market share.

There is no formal non-compete arrangement or territorial or operational demarcation between our Company and Sakuma Exports Limited. Consequently, there can be no assurance that Sakuma Exports Limited will not pursue business strategies or opportunities that are in competition with those of our Company. Such overlap may divert business opportunities or cause confusion in the market or among customers, which could adversely impact our brand, business relationships, and growth prospects.

Furthermore, any adverse developments, litigation, or reputational concerns involving Sakuma Exports Limited may also have a spill-over impact on our Company due to our association as Group Companies, even if we are not directly involved in such matters. Any such actual or perceived conflict of interest or competitive activity by Sakuma Exports Limited could have a material adverse effect on our business, financial condition, results of operations, and prospects.

For further details, see the chapter titled “*Our Group Companies*” on page 212 of this Draft Red Herring Prospectus.

25. Our operating results could be significantly impacted if we are unable to accurately forecast consumer demand for our products or effectively manage our inventory.

Our business involves selling finished sugar and beverages from third-party manufacturers, which we sell under our brand name through a network of distributors and super stockists. We aim to maintain optimal inventory levels to meet market demand while controlling storage costs and managing our working capital efficiently.

We manage our inventory by closely tracking current stock levels and keeping a reserve based on demand forecasts. However, if we fail to forecast demand accurately, we may face excess inventory or product shortages. Excess inventory could lead to write-offs, discounted sales, and a decrease in gross margins, which may also weaken our brand strength. Conversely, a shortage of products could prevent us from meeting customer demand, which could negatively impact our business operations and financial performance. Inaccurate demand forecasts can also result in an over-supply of products, driving up inventory costs, negatively affecting cash flow, reducing inventory quality, causing shrinkage, and ultimately diminishing margins.

26. Our Company benefits from certain export benefit schemes which are subject to the policies and decisions of the Government. Any reduction in or termination of incentives/ subsidies/ schemes we enjoy or change in other favourable government policies resulting in reduction or termination of incentives/ subsidies/ schemes may affect our business, results of operations, cash flows and financial condition.

We have availed benefits under certain export promotion schemes such as Duty Drawback Scheme; and Remission of Duties and Taxes on Exported Products (RoDTEP); in relation to our operations. To avail these benefits, we are required to comply with specific conditions set by the respective authorities. There is a risk that any failure to meet these conditions could lead to the suspension or revocation of the benefits under the respective schemes, (a) RoDTEP: all the exporters are eligible to avail the benefits under this scheme subject to the condition that the exported products should have India as their country of origin to be eligible for benefits under the scheme. Further, there is no turnover threshold for availing benefits under the scheme. The foreign trade policy lists out the categories of exports/ exporters shall not be eligible for rebate under RoDTEP scheme, however, our Company does not fall in such category; (b) Duty drawback scheme: the Duty Drawback Scheme is available for the import of exported goods into India as well as for the export of goods made from imported, indigenous, or a combination of both materials. To qualify for benefits under this scheme, the Company must be the legal owner of the goods at the time of export, and customs duty must have been paid on the imported goods. Our Company fulfils the conditions required, to be eligible for the benefits under this scheme

Any newly introduced or revised policies in relation to the benefits availed by us issued by relevant authorities, may deprive us of our existing benefits. We cannot predict the current or future initiatives of the governments and relevant authorities and there can be no assurance that we will continue to enjoy the mentioned subsidies and incentives. We may not be able to comply with the obligations and stipulations that would allow us to avail ourselves of such benefits or concessions, and consequently, we may lose such benefits and concessions. If there is a failure to adhere to any criteria while availing of benefit, it could also result in the reversal of benefits, potentially leading to the imposition of interest and penalties as outlined in the pertinent scheme. Further, any failure to meet the obligations under such schemes may result in an adverse effect on our business operations and our financial condition.

27. We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.

Our Company has established a brand presence under our brand name and has taken measures to safeguard our brand identity by applying for registration of our brand logo and trademarks under the Trademarks Act, 1999. Certain applications for registration of our trademarks are currently pending and are at the stage of hearing before the appropriate authorities. As on date of this Draft Red Herring Prospectus, we are not subject to any material litigation in relation to our intellectual property.

We may be susceptible to objections or claims from third parties alleging infringement or other related violations. If such objections are raised, those objections could: (a) adversely affect our relationships with current or future customers; (b) result in costly litigation; (c) cause product shipment delays or stoppages; (d) divert management's attention and resources; (e) subject us to significant liabilities and (g) require us to cease certain activities.

Further, legal proceedings to protect or enforce our intellectual property rights may be time-consuming, expensive, and uncertain in outcome. In addition, detecting and acting against such violations in a timely manner may not always be feasible. Any failure to successfully obtain or defend our intellectual property rights could lead to erosion of our brand value and may adversely affect our business, financial condition, and results of operations.

For further details refer to the chapters titled "*Our Business - Intellectual Property*" and "*Government and Other Approvals - Intellectual Property*" beginning on pages 148 and 280, respectively.

28. Certain of our corporate records and those of our Corporate Promoter are not traceable. We cannot assure you that legal proceedings or regulatory actions will not be initiated against us in the future, or

that we will not be subject to any penalty imposed by the competent regulatory authority in relation to such discrepancies.

Accordingly, certain disclosures in this Draft Red Herring Prospectus in relation to such untraceable corporate or secretarial records have been made with reliance on other supporting documents available in our records, including the resolutions passed by the Board or Shareholders in their meetings, or documents annexed to the filings sent to the relevant regulatory authorities. Further, we have relied on the search report dated September 26, 2025, issued by Rajeev Bhambri & Associates, Company Secretaries & Insolvency Professional (having peer review certificate bearing number 5824/2024), pursuant to their inspection and independent verification of the documents available or maintained by our Company, the Ministry of Corporate Affairs at the MCA Portal and the RoC.

Further, with respect to corporate records of our Corporate Promoter, Sakuma Infrastructure and Realty Private Limited, resolution passed for change of name from "Sakuma Financial Services (India) Private Limited" to "Sakuma International Marketing Private Limited" on March 15, 1995 and resolution dated June 27, 2011, for name change of the company from "Sakuma International Marketing Private Limited" to "Sakuma Infrastructure and Realty Private Limited" are not traceable. Any perceived lack of transparency or non-compliance at the promoter level may affect investor confidence in this Offer.

While no legal proceedings or regulatory action has been initiated against our Company or our Corporate Promoter is pending in relation to such untraceable corporate or secretarial records, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company or our Corporate Promoter or that any fines or penalty will be imposed by regulatory authorities on our Company or our Corporate Promoter in this respect in the future.

- 29. Any claim of intellectual property infringement from third parties, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such**

claims, and may divert the efforts and attention of our management and technical personnel away from our business. Our inability to obtain or maintain our trademarks in our business, could adversely affect our reputation, goodwill, business prospectus, and results of operations.

Our ability to attract and retain our customers is also dependent upon public perception and recognition of the quality associated with our brand. Any damage to our brand could adversely impact the trust placed in the brand and our reputation and cause existing customers or intermediaries to withdraw their business and reconsider doing business with us. While there has been no past instance of negative publicity / false propaganda / allegation/ reputation damage, during the last three financial years, any negative publicity may result in increased regulation and legislative scrutiny of industry practices as well as increased litigation, which may further increase our costs of doing business by requiring us to make provisions or consider claims under such litigations as contingent liabilities and adversely affect our profitability.

Further, while we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing third-party intellectual property rights. Any claims of intellectual property infringement from third parties, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims, and may divert the efforts and attention of our management and technical personnel away from our business. While there has not been any instance of any third-party alleging infringement of their intellectual property by our Company in the past last three financial years, the risk of being subject to intellectual property infringement claims will increase as we continue to expand our operations and offerings. As a result of such infringement claims, we could be required to pay third party infringement claims. The occurrence of any of the foregoing could result in unexpected expenses.

30. We rely on third-party transportation providers for and distribution of our products. Any failure by any of our transportation providers to deliver our products on time, or in good condition, or at all, may adversely affect our business, financial condition and results of operations.

We depend on various forms of transportation to deliver the finished products to our super stockists, distributors and other parties. For these purposes, we typically use third-party transportation providers. We are therefore significantly dependent on transportation and logistics companies that we engage with.

The disruption of transportation services due to natural factors such as weather conditions particularly during monsoon or flood seasons, or man-made factors such as strikes, accidents, or other inadequacies in the transportation infrastructure, or any other factor that could impair the ability of our suppliers to deliver the products to us and our ability to deliver our products to our super stockists and distributors and their ability to deliver products to the end retailers and wholesalers in a timely manner, which may adversely affect our sale of our products. Our products may be lost, damaged or deteriorated and contaminated due to improper handling, negligence, transport strike or accidents or any other force majeure events which may not be within our control. Additionally, if we lose one or more of our third-party transportation providers, there can be no assurance that we will be able to find new or alternative third-party transportation providers at all, or at terms as favourable as those which we have in force with our current partners.

Further, our third-party transportation providers may not carry adequate insurance coverage and therefore, any losses that may arise during the transportation process may have to be claimed under our insurance policy. There can be no assurance that we will receive compensation for any such claims in full amount in a timely manner or at all, and consequently, any such loss may adversely affect our business, financial condition and results of operations

31. Our Company has delayed filing certain statutory forms with the Registrar of Companies (RoC) in the past, and any future delays or regulatory actions for such non-compliances could adversely affect our business operations and financial position.

Our Company has made delays in certain statutory filings with the Registrar of Companies (RoC), which were filed after due date by paying additional fees. These delays occurred due to inadvertent reasons and ranged from 1 to 30 days. The details of delayed filings are as follows:

S. No.	Description of Form	Date of event	Due Date	Date of filing	Delay (No. of Days)	Reason for delay
1.	ADT-1	30-09-2023	15-10-2023	23-10-2023	8 days	Inadvertent
2.	AOC -4	30-09-2023	30-10-2023.	29-11-2023	30 days	Inadvertent
3.	CHG-1	29-12-2023	28-01-2024	12-02-2024	15 days	Inadvertent
4.	DPT-3	30-06-2024	30-06-2024	24-07-2024	24 days	Inadvertent
5.	DIR 12	17-01-2024	16-02-2024	06-03-2024	18 days	Inadvertent
6.	DIR 12	30-09-2023	30-10-2023	29-11-2023	30 days	Inadvertent
7.	MGT-7	30-09-2022	29-11-2022	24-12-2022	25 days	Inadvertent
8.	MGT-14	26-05-2025	25-06-2025	27-06-2025	2 days	Inadvertent
9.	MGT-14	01-10-2024	31-10-2024	07-11-2024	7 days	Inadvertent

As of now, our Company has paid requisite additional fees for delays in filing these forms. However, there is no assurance that such delays will not occur in the future, and we may be subject to regulatory actions and penalties, which could adversely affect our business operations and financial position.

In order to strengthen our internal compliance mechanisms and ensure adherence to prescribed statutory timelines, the Company would implement a formal compliance monitoring system, designate responsible personnel for overseeing statutory filings, and engage external professionals if required for ongoing support. However, as on the date of this Draft Red Herring Prospectus, these measures have not been implemented. Until such measures are effectively operational, we remain exposed to the risk of potential delays in statutory compliance, which may subject us to penalties or other regulatory actions and could adversely affect our business operations, reputation, or financial position

32. The Company, its Promoter Saurabh Malhotra and Group Company, Sakuma Exports Limited are party to certain litigations. These legal proceedings are pending at different levels of adjudication before various forums and regulatory authorities, which, if determined adversely, may impact our reputation and business operations.

Certain legal proceedings involving our Company, Promoter Mr. Saurabh Malhotra and Group Company Sakuma Exports Limited are pending at different levels of adjudication before various courts, tribunals and authorities. In the event of adverse rulings in these proceedings or consequent levy of penalties, we may need to make payments or make provisions for future payments, and which may increase expenses and current or contingent liabilities.

*In all three criminal proceedings, both our Group Company, Sakuma Exports Limited, and our Promoter, Mr. Saurabh Malhotra, have been named as parties to the same matter.

** Since the amount of Rs. 17.58 lakhs claimed by the petitioner in Execution Appln/100115/2018- Sri. S. H. Prakash vs M /S. Sakuma Exports Ltd. and Ors. which has been filed against our Promoter, Mr. Saurabh Malhotra, and our Group Company, Sakuma Exports Limited both, has been included under the head litigation involving our promoters-against our promoters, the said amount has not been included here.

For further details, see the chapter titled “**Outstanding Litigation and Other Material Developments**” beginning on page no. 270 of this DRHP.

There can be no assurance that these litigations will be decided in our favour or in favour of our our Company, Promoter Mr. Saurabh Malhotra and Group Company, Sakuma Exports Limited, respectively, and consequently it may divert the attention of our management and Promoters and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For further details, please refer to the chapter titled “**Outstanding Litigation and Material Developments**” on page 270 of this Draft Red Herring Prospectus.

33. We could be adversely affected by a change in consumer preferences, perception and spending habits. Further, if our product development efforts to cater to changing consumer preferences are not successful, our business may be restricted.

The demand for our products is closely tied to consumer preferences, lifestyle trends, health consciousness, and economic factors that influence discretionary spending. Increasing public focus on nutrition, dietary awareness, and health risks associated with sugar consumption may result in changing consumption patterns that affect our sales performance. In particular, consumers in urban and semi-urban areas are becoming more conscious of the health implications of high sugar intake, which could lead to declining demand for both sugar and beverages. Additionally, any negative media coverage or regulatory scrutiny concerning sugar content, food safety, or quality standards may influence public perception and reduce demand for our products.

Further, our ability to respond to these changing preferences depends on our product development efforts, which require ongoing research, innovation, and investment. If we fail to develop and introduce new products that align with emerging health trends—such as reduced-sugar, zero-calorie, or functional beverages—or

adapt our sugar offerings to meet changing usage patterns (e.g., industrial, alternative sweeteners), our growth may be restricted.

Consumer preferences can also shift rapidly due to external factors such as economic slowdowns, inflationary pressures, or shifts in disposable income, which may reduce demand for non-essential food and beverage products. This risk is particularly relevant in rural and semi-urban markets where price sensitivity is high.

34. Any contamination or deterioration of our products could result in legal liability, damage our reputation and adversely affect our business prospects and financial performance.

We are engaged in the business of selling sugar, carbonated and fruit based beverages, rice, pulses and milk powder that are manufactured and packaged by third-party manufacturers under our brand name. While we are not involved in the manufacturing process, we remain responsible for ensuring that the products sold under our brand meet applicable quality and safety standards. Our industry is inherently exposed to risks associated with contamination, spoilage, and product deterioration, which can occur at any stage from manufacturing to final delivery.

Given the semi-perishable nature of our products, particularly beverages which typically have a shelf life of approximately four months, there is an increased risk of quality degradation due to improper handling, temperature variation during storage and transportation, packaging defects, or substandard raw materials used by our third-party manufacturers. Although we follow vendor onboarding protocols and quality verification mechanisms such as batch-level inspections and certifications, our control over the actual manufacturing and packaging process is limited. Accordingly, we are reliant on our manufacturing partners' compliance with applicable laws, including the Food Safety and Standards Act, 2006, and their internal quality control systems.

In addition, any instance of product contamination, adulteration, spoilage, or deviation from regulatory standards whether deliberate, accidental, or due to negligence could require us to recall the affected products, leading to reputational damage, legal exposure, and financial losses. We may be subject to liabilities under food safety and consumer protection laws, including civil and criminal penalties, in cases where the contaminated or deteriorated product is deemed unfit for consumption.

Contamination or deterioration risks are not limited to manufacturing but also extend to transportation and warehousing. Any failure in maintaining the required quality, hygiene, or temperature standards across the supply chain could similarly expose us to liability.

Further, contamination of any of our products could also subject us to product liability claims, adverse publicity and government scrutiny, investigation or intervention, product return, resulting in increased costs and any of these events could have a material and adverse impact on our reputation, business, financial condition, cash flows, results of operations and prospects. Although historically we have not experienced any significant product liability claims or similar allegations against us or our products, there can be no assurance that there will not be any such claims or allegations in the future which could materially and adversely affect our business and financial performance or lead to civil and criminal liability or other penalties. Any negative claim against us, even if meritless or unsuccessful, could divert our management's attention and other resources from other business concerns, which may adversely affect our business and results of operations. Any such event may have a material adverse effect on our reputation, business, financial condition, cash flows, results of operations and prospects.

35. We have certain contingent liabilities and commitments which if materialized, could adversely affect our financial condition.

As of March 31, 2025, our contingent liabilities and commitments as disclosed in our Restated Financial statement aggregated to Rs. 7.48 Lakhs. A summary table of our contingent liabilities and commitments as of March 31, 2025, as disclosed in the Restated Financial Statements is set forth below:

(Rs. In Lakhs)

Particulars	As at March 31, 2025
I. Contingent Liabilities	
(a) claims against the company not acknowledged as debt;	-
(b) guarantees excluding financial guarantee; and	-
(c) other money for which the company is contingently liable	7.48
II. Commitments	
(a) estimated amount of contracts remaining to be executed on capital account and not provided for	-
(b) uncalled liability on shares and other investments partly paid	-
(c) other commitments	-

For details, see “*Restated Financial Information*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations - Contingent Liabilities*” beginning on pages 217 and 260, respectively, for more information. The contingent liability may become actual liabilities. In the event that any of our contingent liabilities become noncontingent, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current Financial Year or in the future.

36. Our Group Company, Kuma Infra and Realty Private Limited has incurred losses in the past, which could not be perceived positively by external parties.

Group Company, Kuma Infra and Realty Private Limited has incurred losses in the past, the details of which is given hereinbelow:

(Rs. in Lakhs)

Sr No.	Name of the Group Company	FY 2024-25	FY 2023-24	FY 2022-23
1.	Kuma Infra and Realty Private Limited	35.71	(29.21)	(0.45)

Any operating losses may not be perceived positively by external parties such as customers, bankers, suppliers and other stakeholders which could adversely affect our credibility and the overall operations of the group, financial conditions, and also divert the attention of the management and Promoters towards the group company which could have an adverse effect on our operations and financials. For more information, regarding the Company, please refer chapter titled “*Our Group Companies*” beginning on page 212 of this Draft Red Herring Prospectus.

37. We operate in a competitive market and any increase in competition may adversely affect our business and financial condition.

We operate in a highly competitive environment, particularly in the sugar and carbonated and fruit based beverages segments. In the sugar industry, we face competition from numerous small to medium-sized producers. Although the sector has witnessed some consolidation, it remains highly fragmented.

Additionally, our ability to compete effectively is influenced by several factors such as the quality and consistency of our products, rejection ratios, pricing, brand perception, customer service, and logistical convenience. Some of our competitors may be vertically integrated sugar producers or large-scale players with greater control over their supply chains and manufacturing, as well as access to superior resources and distribution networks.

In the carbonated beverage segment, we face competition from various regional, national and international brands, including companies with larger distribution footprints and greater marketing spend. Our business is dependent on third-party manufacturing, which may limit our flexibility in responding to changing market dynamics compared to vertically integrated competitors. Any inability to compete effectively whether due to pricing pressures, failure to maintain product quality, inability to adapt to changing customer preferences, or lack of promotional visibility could result in a loss of customers and market share, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

38. Our e-commerce business faces distinct risks, and our failure to successfully manage those risks could have a negative impact on our profitability.

We sell our products on certain third-party e-commerce platforms. As a result, we encounter risks and difficulties frequently experienced by retailers who use e-commerce to sell their products. The successful operation of our business as well as our ability to provide a positive shopping experience that will generate orders, brand loyalty and drive subsequent visits depends on the efficient and uninterrupted operation of our order-taking and fulfilment operations. Our business and profitability are also dependent on the efficient and uninterrupted functioning of these third-party platforms, including order processing, fulfilment, delivery, and payment systems. Any disruptions, technical failures, cybersecurity incidents, payment processing issues, or limitations in product visibility compared to competitors could adversely affect our sales and brand reputation.

In addition, we must keep up to date with competitive technology trends, including the use of new or improved technology, creative user interfaces, virtual and augmented reality, and other e-commerce marketing tools such as paid search and mobile apps, among others, which may increase our costs and may not increase sales or attract customers. Our competitors, some of whom have greater resources than we do, may also be able to benefit from changes in e-commerce technologies, which could harm our competitive position. If we are unable to allow real time and accurate visibility to product availability when customers are ready to purchase, quickly and efficiently fulfil our customers' orders using the fulfilment and payment methods they demand, provide a convenient and consistent experience for our customers regardless of the ultimate sales channel, or effectively manage our online sales, our ability to compete and our results of operations could be adversely affected.

39. In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business, it may have a material adverse effect on our business.

Our operations are subject to government and statutory regulations, and we are required to obtain and maintain a number of licences, registrations, permits, consents and approvals under various central, state and local laws to carry on our business. While we have, in all material aspects, obtained the requisite approvals, licenses, registrations and permits necessary for our operations, there may be instances where we may have failed to apply for, delaying in applying for or not obtained certain approvals that may be applicable to us. For details, refer to "*Government & other Approvals – Material approvals applied for but not received*" and "*Government & other Approvals – Material approvals required but not obtained or applied for*" beginning on page 280 and 280 respectively. Any such non-compliance or breach could result in penalties or other regulatory actions being imposed on our Company, which may have an adverse effect on our business, financial condition, results of operations and cash flows.

We are required to apply for renewals of certain approvals, licenses, registrations, and permits from time to time upon their expiry, or obtain fresh approvals as may be necessary in the ordinary course of our business. While we generally endeavour to make such applications within the prescribed timelines, there can be no assurance that the requisite approvals will be granted or renewed in a timely manner, or at all. Any delay or inability in obtaining or renewing such approvals could adversely impact our operations.

There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could adversely affect our related operations. Further, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/ penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

The approvals obtained by us are subject to various conditions, including but not limited to, limits on the usage of raw materials and compliance with applicable fire safety norms. In certain cases, prior consent of the relevant authority is required for any modification, alteration, or change in our services. These approvals also typically require periodic renewals and continuing compliance with prescribed conditions. We cannot assure that such approvals, licenses, registrations, or permits will not be suspended, revoked, or cancelled in the event of any actual or alleged non-compliance with their terms, or as a consequence of any regulatory action.

40. We will continue to be controlled by our Promoter and Promoter Group after the completion of the Offer, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

As of the date of this Draft Red Herring Prospectus, our Promoter and Promoter Group hold 100% of the issued and outstanding paid-up share capital of our Company. As a result, they will have the ability to influence matters requiring shareholders' approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot assure you that our Promoters and Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

For further details regarding our shareholding, please refer to the chapter titled "*Capital Structure*" beginning on page 87 of this Draft Red Herring Prospectus.

41. We are dependent on our Promoters, Key Managerial Personnel and Senior Management. The loss of or our inability to attract or retain such persons could adversely affect our business, results of operations, financial condition and cash flows.

We rely on the management skills and strategic guidance of our Promoters for developing business strategies, ensuring their successful implementation, and navigating future challenges. Additionally, we significantly depend on the expertise, experience, and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will largely depend on our ability to retain these key individuals. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in their current roles, it could be difficult for us to find suitable or timely replacements, which could adversely impact our business, financial condition, and results of operations.

Furthermore, our Promoters may be involved in other ventures and may divert time and attention away from our business, which could affect the efficiency and profitability of our operations. The industry in which we operate is highly competitive, particularly in terms of attracting and retaining management and skilled personnel. There is significant competition for such talent, and it may be challenging to secure the personnel we need in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives, and other benefits to attract these skilled professionals. If we are unable to attract and retain talented employees, experience high attrition levels that are beyond our control, or fail to motivate and

retain existing employees, our business, financial condition, and results of operations could be adversely affected. For further information, see “***Our Management***” on page 184 of this Draft Red Herring Prospectus.

42. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

We enter into certain transactions with related parties in the ordinary course of our business and may continue to enter into related party transactions in the future. These transactions include, inter alia remuneration, salary, unsecured loan granted or accepted, rent expenses, availing and rendering of services, etc.

In particular, our registered office is currently taken on lease from one of our Promoters, Ms. Kusum Chander Mohan Malhotra, and a member of the Promoter Group, Ms. Vanitha Malhotra. While we have undertaken such transactions on an arm’s length basis and in accordance with applicable laws, such arrangements may give rise to potential conflicts of interest and may be subject to scrutiny.

All related party transactions that we have entered into are in compliance with the Companies Act, 2013 and applicable regulations. Any related party transactions that we may enter into after listing will be subject to requisite approvals of the Board, Audit Committee and/or shareholders, as applicable. However, there can be no assurance that such transactions, whether individually or in the aggregate, will not adversely affect our business, financial condition, results of operations, or cash flows. Further, any future related party transactions may involve potential conflicts of interest, which could be detrimental to our Company. There can be no assurance that our directors or executive officers will be able to effectively address or mitigate such conflicts, if any arise in the future.

For more details, see “***Restated Financial Information – XXXII– Related Party Disclosures***” beginning on page 217.

43. If we are unable to manage our growth effectively and further expand into new markets, and secure additional capital resources, our business, financial performance, and results of operations could be materially and adversely affected.

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist, including by continuing to strengthen our existing product portfolio with attractive growth and profitability prospects, striving for cost efficiency, attracting and retaining talented employees, and focusing on consistently meeting quality standards.

Our expansion will further depend to an extent on the availability of adequate debt and equity capital. The actual expenditure incurred may be higher than current estimates owing to but not limited to, implementation delays or cost overruns. We may, therefore, primarily try to meet such cost overruns through our internal accruals and in case the same is not adequate, we may have to raise additional funds by way of additional term debt from banks/ financial institutions and unsecured loans, which may have an adverse effect on our business and results of operations.

As we continue to grow our business and expand into newer markets, we may face several challenges, including as set forth below:

- A. Acquiring new customers;
- B. Identifying customer requirements and preferences in such markets;
- C. Making accurate assessments of the resources we will require;
- D. Preserving a uniform culture, values, and work environment;
- E. Recruiting, training, and retaining sufficient skilled management, technical and marketing personnel;

- F. Maintaining high levels of customer satisfaction; and
- G. Adhering to expected performance and quality standards.

44. Our ability to pay dividends in the future will depend on our future cash flows, working capital requirements, capital expenditures, and financial condition.

We have not declared dividends in the past; however, the declaration, payment, and amount of any future dividends is subject to the discretion of the Board and Shareholders, and will depend upon various factors, inter alia, including financial performance including profits of our Company, present and future capital expenditure plans including organic/inorganic growth opportunities, financial commitments, financial requirements for business expansion and/or diversification, acquisition etc. of new businesses in order to strike an optimum balance between rewarding shareholders through dividend and ensuring that sufficient funds are retained for the growth of our Company.

The external factors on the basis of which our Company may declare the dividend shall inter alia include the state of the economy and capital markets, applicable taxes, and regulatory changes which include the introduction of new or changes in existing tax or regulatory requirements. Any of these factors may thus restrict our ability to pay dividends in the future. Hence, there can be no assurance that we will be able to pay dividends in the future.

45. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject, and this may have a material effect on our business and financial condition.

While we maintain insurance coverage in amounts that we believe are commercially appropriate, including related to our products stored in the premises where goods are kept for storage, to provide appropriate coverage in relation to fire, explosions, floods, inundations, earthquakes, and landslides, we may not have sufficient insurance coverage to cover all possible economic losses, including when the loss suffered is not easily quantifiable and in the event of severe damage to our business. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy. As of the date of this Draft Red Herring Prospectus, there has been no instance or event that has required us to make a claim under any of our insurance policies. Additionally, there may be various other risks and losses for which we are not insured, either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition, and cash flows.

In addition, in the future, we may not be able to maintain insurance of the types or at levels which we deem necessary or adequate or at rates which we consider reasonable. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductibles or co-insurance requirements), could have an effect on our business, results of operations, financial condition, and cash flows.

46. We have not independently verified certain data in this Draft Red Herring Prospectus.

We have not independently verified data from the industry and related data contained in this Draft Red Herring Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or

discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

47. Inability to protect, strengthen and enhance our existing reputation could adversely affect our business prospects and financial performance.

Our business reputation is critical to the success of our business. While we have been making consistent efforts to strengthen our image, various factors, some of which are beyond our control, are critical for maintaining and enhancing our reputation and if not managed properly, may negatively affect our brand and reputation. These include our ability to effectively manage the quality of our products, increase brand awareness among existing and potential customers, adapt our advertising and promotion efforts to emerging industry standards and protect the intellectual property related to our brand.

Our success in marketing our existing and new products depends on our ability to adapt to a rapidly changing marketing and media environment, including our increasing reliance on direct promotional initiatives. There can be no assurance that our marketing efforts will be successful in maintaining our reputation and its perception with customers and/ or result in increased sales in the future. Also, we may not necessarily increase or maintain our sales promotion spending in proportion to our growth in the future, which may result in limited marketing initiatives. Our inability to adapt to evolving marketing trends at the same pace as our competitors may adversely affect our ability to effectively compete in terms of our image value.

Our reputation could also be negatively impacted if we fail to maintain our established standards of quality, or if our products fail to meet the expectations of our customers. Any allegations of deterioration in product quality even when false or unfounded, could tarnish our image and may cause our customers to choose other competing products. Any negative publicity regarding us, our reputation, our products or the pharmaceuticals and cosmetics industry in general could adversely affect our business and our results of operations. Other risks associated with our business include improper disclosure of proprietary information, negative comments about our brands or product quality and issues with ancillary services such as delivery, exposure of personally identifiable information, fraud, hoaxes or malicious exposure of false information. In addition, counterfeit products, product defects and ineffective promotional activities are potential threats to the image and potency of our brand. Our failure to develop, maintain and enhance our brand may result in decreased revenue and loss of customers and in turn adversely affect our reputation, business, financial condition, results of operations and cash flows.

48. We may be subject to unionization, strikes, work stoppages or increased labour costs, which could adversely affect our business and results of operations.

Our business operations depend on the continued services of our employees as well as the uninterrupted functioning of third-party manufacturers. For details and categorisation of our employees, refer “***Our Business – Human Resources***” beginning on page 148. Although we have not experienced any major interruption to our operations as a result of labour disputes in the recent past, there can be no assurance that we will not experience any such disruption in the future as a result of disputes or disagreements with our work force, which may adversely affect our ability to continue our business operations

Further, since the manufacturing and packaging of our products are carried out by third-party manufacturers, any labour-related disruptions, such as strikes, lockouts, or increased labour costs at their end, may also adversely impact our ability to ensure timely production and supply of our products. We do not have direct control over their workforce and internal policies and may be indirectly affected by their labour-related issues.

Any such disruption, whether within our organisation or at our third-party manufacturers, could adversely impact our ability to meet customer demand, fulfil supply obligations in a timely manner, and maintain our reputation in the market. In the past three years, we have not experienced any labour disputes/strikes/lockouts/industrial accidents. However, in the event of any prolonged delay or disruption of our business, results of operations and financial condition could be materially and adversely affected.

49. There are certain restrictive covenants in the agreement that our Company has entered into with ICICI Bank.

The overdraft facility agreement entered into by us with ICICI Bank contain specific covenants which require us to obtain the prior approval/ permission from the bank on the occurrence of certain events such as voluntarily or involuntarily sell, transfer, grant, lease or otherwise dispose of or deal with, all or substantially all of its properties or assets or any division thereof in favour of any persons; any change in our capital structure resulting in reduction of capital; buy-back, de-merger, sale of any undertaking, reorganization, scheme, arrangement or compromise with its creditors or shareholders, or any scheme of amalgamation or reconstruction; winding-up or dissolution; create, incur or assure any further borrowings, make any investments whether by way of deposits, loans, or investments in share capital or otherwise, undertake any new business or operations or project or diversification, modernisation or substantial expansion of any of its existing business or operations or of any project that it may undertake during the currency of the facility etc. We are required to obtain consent/approval from our lender before undertaking any such steps which have been mentioned in the said overdraft facility agreement. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants. In the event we breach any financial or other covenants contained in our financing arrangements with ICICI bank, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows.

Further, as a security to the overdraft facility, the Company has deposited an FDR amounting to Rs.1,00,00,000 (Rupees One Crore only), and carries an interest at the rate of 2.75% per annum in favour of the bank. Any fluctuations in interest rates may directly impact the interest costs of these loans, affecting our business, financial condition, results of operations, and prospects. Our ability to repay and refinance our indebtedness will depend on our continued ability to generate cash from future operations. We may not be able to generate sufficient cashflow from operations or obtain enough capital to service our debt obligations effectively.

50. Our Company has not made provisions for any potential decline in the value of investments.

This non-provisioning practice may pose significant risks to our Restated Financial Statements and investor perceptions. In the event of a substantial decrease in investment values, our financial position and profitability as presented in our Restated Financial Statements may be materially overstated. If we are required to recognize significant devaluations of investments of investors in the future, it could have a material adverse effect on our reported financial performance and financial position. This circumstance could lead to a sudden and significant reduction in our reported assets and profits, which may not be foreseen by investors relying on our Restated Financial Statements. This situation may also expose us to regulatory scrutiny and penalties for inadequate disclosure or potential non-compliance with accounting standards. Additionally, it could impact our ability to meet financial covenants in our lending agreements or affect our credit ratings. Potential investors should be aware that our Restated Financial Statements may not fully reflect the risk of investment value fluctuations, and future results could differ materially from those currently presented. This discrepancy between reported and actual financial position could lead to fluctuations in our stock price and potentially impact our ability to raise capital in the future.

51. The schedule of our estimated deployment of Net Proceeds is subject to inherent uncertainties.

The fund requirement and deployment are based on internal management estimates and our Company's current business plan and are subject to change in light of changes in external circumstances or costs, other financial conditions, business or strategy. These estimates have not been appraised by any bank or financial institution. In view of the dynamic nature of the sector and specifically that of our business, we may have to revise our expenditure and fund requirements as a result of variations in cost estimates, exchange rate fluctuations and external factors which may not be within the control of our management. This may entail rescheduling and revising the planned expenditures and fund requirements and increasing or decreasing expenditures for a particular purpose at the discretion of our management, within the objects. For further details refer to "*Objects of the Offer*" beginning on page 103.

EXTERNAL RISK FACTORS

52. Economic factors that are beyond our control may have an adverse effect on our business and results of operations.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, including but not limited to rising financial or trade deficits, in other emerging market countries, may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. We are dependent on domestic, regional, and global economic and market conditions. Our performance, growth, and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional, and global economies. Economic growth in the countries in which we operate is affected by various factors, including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition, and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate, in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition, results of operations, and cash flows, and reduce the price of our Equity Shares.

53. Changing laws, rules, and regulations, including adverse application of tax laws, may adversely affect our business, prospects, cash flows, and results of operations.

The regulatory and policy environment of India is evolving and subject to change. Unfavorable changes in or interpretations of existing laws, or the promulgation of new laws, rules, and regulations, including foreign investment and stamp duty laws governing our business and operations, could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision, clarified the components of basic wages that need to be considered by companies while making provident fund payments, which resulted in an increase in the provident fund payments to be made by companies. Any such decisions in the future or any further changes in the interpretation of laws may have an impact on our business, prospects, cash flows, and results of operations.

Further, any future amendments may affect our tax benefits, such as exemptions for income earned by way of dividends from investments in other domestic companies and units of mutual funds, exemptions for interest received in respect of tax-free bonds, and long-term capital gains on equity shares.

The GoI introduced (a) the Code on Wages, 2019 (“Wages Code”); (b) the Code on Social Security, 2020 (“Social Security Code”); (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020, which consolidate, subsume and replace numerous existing central labor legislations. Except for certain portions of the Wages Code, which have come into force pursuant to notification by the Ministry of Labor and Employment, the rules for implementation under such codes are yet to be notified. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

We cannot predict the impact of any changes in or interpretations of existing laws, rules, and regulations applicable to us and our business, or the promulgation of new laws, rules, and regulations applicable to us and our business. Unfavorable changes in or interpretations of existing laws, or the promulgation of new laws, rules, and regulations, including foreign investment and stamp duty laws governing our business and operations, could result in us, our business, operations, or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and expend resources relating to compliance with such new requirements, which may also require significant management time, and any failure to comply may adversely affect our business, results of operations, cash flows, and prospects. It may also impact the viability of our current business or restrict our ability to grow our business in the future. For details, see “*Key Regulations and Policies*” beginning on page 171.

54. Political instability or deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, social and other political, economic, or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment, and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition, and results of operations, in particular.

55. A downgrade in ratings of India may affect the trading price of the Equity Shares.

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India’s credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of the Equity Shares.

56. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe, and certain emerging economies in Asia. Financial turmoil in Asia, Russia, and elsewhere in the world in recent years has adversely affected the Indian

economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations, and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and, consequently, have an impact on the Indian economy. The full-scale military invasion of Russia into Ukraine and the subsequent sanctions placed on Russia by various countries have substantially affected the economic stability of the world, and such volatility could impact the Company's growth.

In addition, the USA is one of India's major trading partners, and any possible slowdown in the American economy as well as a strained relationship with India, could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition, results of operation, and cash flows. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and reduce the price of the Equity Shares.

57. If inflation rises in India, increased costs may result in a decline in profits. Inflation rates in India have been volatile in recent years, and such volatility may continue.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products. In such a case, our business, results of operations, cash flows, and financial condition may be adversely affected.

Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

58. Investors may face difficulties in enforcing judgments against our Company, as well as against certain members of our management and Board who reside outside India.

Our Company is incorporated under the laws of India, and substantially all of our assets are located in India. While most of our Promoters, Directors, KMPs, and SMPs reside in India, we have certain members of our Board of Directors, including one of our Independent Directors who is a Non-Resident Indian residing in Dubai, United Arab Emirates, and our Chairman who resides in the United Kingdom. As a result, it may be

difficult for Investors to effect service of process upon such persons within India or to enforce judgments obtained outside India against them.

Moreover, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with Indian public policy. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the RBI under the FEMA to repatriate any amount recovered, and such approval may not be forthcoming.

The recognition and enforcement of foreign judgments in India are governed by Sections 13 and 44A of the Civil Code, which provide that a suit must be brought in India within three years of the date of the judgment sought to be enforced. Generally, there are considerable delays in the disposal of suits by Indian courts. Furthermore, enforcement of foreign arbitral awards is governed under Sections 48, 49, 55, and 57 of the Arbitration and Conciliation Act, 1996. However, the courts may refuse to enforce such awards if the courts find that the subject matter of the dispute is not capable of being settled under the laws of India or if the enforcement would be contrary to the public policy of India.

59. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the Financial Statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.

Our Restated Financial Information for the Financial Years ended on March 31, 2025, 2024, and 2023 has been prepared and presented in conformity with Indian GAAP. Indian GAAP differs in certain significant respects from U.S. GAAP, IFRS, and other accounting principles with which prospective Investors may be familiar in other countries. If our Restated Financial Statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows, and financial position may be substantially different. Prospective Investors should review the accounting policies applied in the preparation of our Restated Financial Statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should be limited accordingly.

60. Our international operations are subject to many uncertainties, and we are exposed to foreign currency exchange rate fluctuations.

We may be subject to risks inherently associated with international operations, including risks associated with foreign currency exchange rate fluctuations, which may cause volatility in our reported income, and risks associated with the application and imposition of protective legislation and regulations relating to import or export or otherwise resulting from foreign policy or the variability of foreign economic conditions.

61. A third party could be prevented from acquiring control of us because of anti-takeover provisions under Indian laws.

There are provisions in Indian law that may delay, deter, or prevent a future takeover or change in control of our Company. Under the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that the interests of Investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our Shareholders, such a takeover may not be attempted or consummated because of SEBI (SAST) Regulations, 2011.

62. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign Investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares, may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

63. Under Indian laws, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares that are sought to be transferred is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no-objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

64. Our Equity Shares, once listed, may be subject to surveillance measures such as Additional Surveillance Measures (“ASM”) and Graded Surveillance Measures (“GSM”) imposed by the Stock Exchanges or SEBI, which could impact trading, liquidity, and the market price of our Equity Shares.

Post-listing, the Equity Shares of our Company may be subjected to ASM and/or GSM surveillance frameworks implemented by the Stock Exchange and SEBI. These measures are pre-emptive in nature and are aimed at enhancing market integrity, curbing excessive volatility, and protecting investor interests.

Scrips are shortlisted for ASM/GSM based on objective market-based parameters such as abnormal price fluctuations, high-low variations, client concentration, price-to-earnings ratio, market capitalization, and volume variations, among others. A company’s shares may also be placed under GSM if there is an abnormal rise in price that is not commensurate with its financial health and fundamentals, including earnings, book value, fixed assets, and net worth.

If our Equity Shares are placed under such surveillance measures, trading may be subject to restrictions such as reduced trading frequency, higher margin requirements, settlement on a trade-for-trade or gross basis, or restrictions on upward price movements. These restrictions could adversely affect the market price, trading volumes, liquidity, and the development of an active market for our Equity Shares and may also negatively impact investor perception and the reputation of our Company.

65. Investors may be subject to Indian taxes, including capital gains tax and other levies, on the sale of the Equity Shares, which could adversely impact the returns from their investment.

Under prevailing Indian tax laws, gains arising from the sale of equity shares of an Indian company are taxable in India. Long-term capital gains (i.e., arising on equity shares held for more than 12 months) exceeding Rs. 1,25,000/- from the sale of listed equity shares through a recognized stock exchange are

presently subject to tax at 12.5% (plus applicable surcharge and cess). Short-term capital gains (i.e., arising on equity shares held for 12 months or less) are subject to tax at 15% (plus applicable surcharge and cess). Securities Transaction Tax ("STT") is also levied at the time of purchase or sale of equity shares on a recognized stock exchange.

The Finance Act, 2019, has further clarified that, unless otherwise agreed, stamp duty in case of sale of securities through a stock exchange shall be borne by the buyer, and in other cases of transfer through a depository, by the transferor. The interpretation and implementation of these provisions are evolving, and their future impact cannot be predicted with certainty.

Additionally, the tax treatment of non-resident investors may vary depending on the provisions of the applicable tax treaty between India and their country of residence. Any changes in tax laws, rates, exemptions, or interpretations may increase the tax liability of investors and could adversely impact the post-tax returns from an investment in the Equity Shares.

66. Future sales of Equity Shares by our Promoters may adversely affect the market price of the Equity Shares.

After the completion of the Offer, our Promoters will own, directly, more than [●]% of our outstanding Equity Shares. Upon expiry of the lock-in period provided under the SEBI ICDR Regulations, our Promoters will be eligible to sell part or all of the Equity Shares held by them. Future sales of a large number of the Equity Shares by our Promoters, either in one sale or over a series of sales, could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur could adversely affect the market price of the Equity Shares. No assurance may be given that our Promoters will not dispose of, pledge, or encumber their Equity Shares in the future, or that the market price of the Equity Shares will not be adversely affected by any such disposal, pledge, or encumbrance of their Equity Shares.

67. The requirements of being a publicly listed company may strain our resources.

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/ or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

68. Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.

The rights of shareholders and the governance framework applicable to our Company are primarily governed by Indian laws and our Articles of Association. These may differ significantly from the legal provisions applicable to companies incorporated in other jurisdictions. For instance, the scope of shareholders' rights,

the duties and liabilities of directors, the enforceability of corporate actions, and mechanisms for shareholder recourse may not be as extensive or as readily enforceable under Indian laws as in certain other countries. As a result, Investors in our Company may find it more difficult to assert their rights or pursue remedies as shareholders, compared to those available to shareholders of companies incorporated in jurisdictions with more developed or investor-protective legal regimes.

69. Future issuances or sales of the Equity Shares could dilute your shareholding and significantly affect the trading price of the Equity Shares.

The future issuance of Equity Shares by us, the disposal of Equity Shares by any of our major shareholders or the perception that such issuance or sales may occur, may lead to the dilution of your shareholding in the Company or significantly affect the trading price of the Equity Shares. These sales could also impair our ability to raise additional capital through the sale of our equity securities in the future. Furthermore, under the Securities Contract (Regulation) Rules, 1957, as amended (“SCRR”), listed companies are required to maintain public shareholding of at least 25% of their issued share capital.

Failure to comply with the minimum public shareholding provision would require a listed company to delist its shares and may result in penal action being taken against the listed company pursuant to the SEBI Act. This may require us to issue additional Equity Shares or require our Promoters or Promoter Group to sell their Equity Shares, which may adversely affect our trading price.

----------------	---	----	----	----	----

Justification for “Holding period” levels

1. Trade Receivables:

Debtor holding days reduced from 52 days in FY 2023 to 26 days in FY 2024 and further to 25 days in FY 2025, on account of improved credit monitoring and collection efficiency. For FY 2026, debtor days are expected to remain around 26 days, in line with past trends. In FY 2027, debtor days are projected to increase moderately to 34 days, primarily due to expansion into new geographies and orders with longer credit cycles. These orders are expected to yield higher margins, thereby offsetting the impact of extended receivable periods.

2. Trade Payables:

Creditor days increased from 7 days in FY 2023 to 21 days in FY 2024 and further to 24 days in FY 2025, supported by better supplier negotiations. Going forward, creditor days are projected to decline to 17 days in FY 2026 and 13 days in FY 2027, as the Company intends to avail cash discounts by making earlier payments. This will lower purchase costs and foster stronger supplier relationships.

3. Inventories:

Inventory holding days rose from 2 days in FY 2023 to 8 days in FY 2024 and 27 days in FY 2025, driven by the transition from a super-stockist model to a distributor-led model, which requires higher stock levels. With the proposed infusion of working capital, inventory days are expected to increase further to 45 days in FY 2026 and 53 days in FY 2027. This increase will enable the Company to maintain adequate finished goods inventory, ensure timely fulfilment of orders, and provide a competitive edge in the market.

Reason for substantial increase of working capital requirement is mentioned below: -

During financial year 2025, Company's total working capital requirement was ₹ 2,560.27 Lakhs, which is projected to increase significantly to ₹ 7,049.95 Lakh in financial year 2026 and ₹ 11,050.89 Lakhs in financial year 2027. The major factors driving this increase are as follows:

- (i) **Working Capital Intensive Business:** Our Company operates in a sector that requires high level of working capital. To overcome the current limitations and support exponential growth, part of the Issue Proceeds will be deployed towards working capital thereby strengthening liquidity and enabling seamless business growth.
- (ii) **Shift to Distribution-led Model:** The ongoing transition from a super-stockist model to a distribution-driven model necessitates higher inventory levels. This change is expected to provide better financial control, improved profitability, and more streamlined operations, while ensuring continuity of sales.
- (iii) **Customer-Centric Payment Flexibility:** We provide customer with flexibility in payment intervals, aligned with product sourcing and industry practices. This approach not only supports customer convenience but also makes our products more accessible to a wider customer.
- (iv) **Geographic Expansion:** We intend to enter newer geographies, thereby broadening its customer base and strengthening its competitive position. This expansion will require incremental working capital to support sales growth.
- (v) **Expansion in Beverages Segment:** The Company is increasing its presence in the carbonated soft drinks category, which will require higher working capital to fund production, distribution, and marketing activities in this segment.

4. General Corporate Purposes

Our Company intends to deploy a portion of the Net Proceeds, aggregating up to Rs. [●] Lakhs, towards general corporate purposes as approved by our management, from time to time, subject to such utilization for general corporate purposes not exceeding 15% of the amount being raised by the Issuer or Rs. 10 crores, whichever is lower, in compliance with the SEBI ICDR Regulations.

In accordance with the policies set up by our Board, the utilization of funds towards general corporate purposes will include, but shall not be restricted to the following:

- a) Meeting operating expenses;
- b) Strengthening of our business development and marketing capabilities
- c) Strategic initiatives; and
- d) On – going general corporate exigencies, which the Company in the ordinary course of business may not foresee or any other purposes as approved by our Board of Directors, subject to compliance with the necessary provisions of the Companies Act.

We confirm that any Offer related expenses shall not be considered as a part of general corporate purposes. Further, we confirm that the amount for general corporate purposes, as mentioned in the Draft Red Herring Prospectus, shall not exceed 15% of the amount being raised by the issuer or Rs. 10 crores, whichever is lower, in compliance with SEBI ICDR Regulations.

The quantum of utilization of funds towards each of the above purposes will be determined by our Board of Directors based on the permissible amount actually available under the head “**General Corporate Purposes**” and the business requirements of our Company, from time to time. We, in accordance with the policies of the Board, will have flexibility in utilizing the Net Proceeds for general corporate purposes, as mentioned above.

GLOBAL MACROECONOMIC SCENARIO

The global economy is projected to experience a deceleration in growth, with global GDP expanding by 2.8% in CY 2025, down from 3.3% in CY 2024. This slowdown is attributed to escalating trade tensions, particularly due to new U.S. tariffs, and heightened policy uncertainties. Global headline inflation is expected to decline to 4.3% in CY 2025 and further to 3.6% in CY 2026, as inflationary pressures ease across advanced economies, aided by tighter monetary policy, improved labour market conditions, and the resolution of supply disruptions. However, global trade growth is forecasted to slow significantly to 1.7% in CY 2025, reflecting the effects of escalating trade barriers and geopolitical instability.

In China, economic prospects remain constrained as the IMF downgraded its CY 2025 GDP growth forecast to 4.0%, due to persistent challenges in the real estate sector, weak consumer demand, and trade-related pressures. In Europe, growth is expected to stagnate, with Germany’s GDP forecast at 0.0% in CY 2025, amidst trade disruptions and domestic weaknesses. The EU is actively seeking to address these challenges through renewed trade dialogue with the U.S.

Meanwhile, India continues to show resilience, with the IMF projecting stable real GDP growth of 6.2% in CY 2025, followed by a slight uptick to 6.3% in CY 2026. This is supported by robust rural consumption and sustained infrastructure investment. The IMF notes that India remains one of the fastest-growing major economies, driven by favourable demographics, expanding digital infrastructure, and rising investment activity. Consumer price inflation in India is projected to moderate to 4.2% in CY 2025, staying within the Reserve Bank of India’s (RBI) target range of 2–6%, which helps maintain purchasing power and economic stability. The IMF also highlights the importance of continued structural reforms in India, particularly in labour markets, logistics, and capital formation, to sustain medium-term growth momentum.

Overall, while inflation is declining globally, the economic outlook remains clouded by geopolitical uncertainty, trade fragmentation, and region-specific structural challenges. However, India’s relative macroeconomic stability, demographic advantage, and ongoing investment cycle place it in a strong position amid global headwinds.

Global GDP Growth Scenario

The global economy began to recover from its lowest levels following the lifting of lockdowns in 2020 and 2021. The pandemic-induced lockdown was a key factor that severely disrupted economic activities, leading to a recession in CY 2020, where global GDP contracted by -2.7%.

The global economy maintained moderate momentum in CY 2024, with real GDP growth estimated at 3.3%, supported by easing inflationary pressures, recovering supply chains, and resilient consumer demand in some major economies. Advanced economies, particularly the U.S., benefitted from strong labour markets and improved private consumption. However, growth remained uneven across regions, with emerging markets facing tighter financial conditions and subdued export demand. Inflation declined faster than anticipated in many regions, enabling some central banks to consider gradual monetary easing by the end of the year.

Global Economic Outlook

At the midpoint of the year, so far in 2025 the global economy continues to exhibit mixed performance, with divergence in outcomes across regions due to differences in economic growth, inflation dynamics, and policy responses. The global GDP growth is projected at 2.8% in CY 2025, down from an estimated 3.3% in CY 2024. While short-term prospects have improved since early 2024 due to easing inflation and gradual loosening of monetary policy in several regions, the broader environment remains challenging. Structural headwinds, such as tighter credit conditions, supply-side bottlenecks, and lingering geopolitical risks, are keeping global growth below historical averages.

The United States has continued to outperform other advanced economies, with growth projected at 1.8% in 2025, though slightly down from 2.8% in 2024, as the economy absorbs the lagged effects of previous monetary tightening and persistent inflation. In contrast, the Euro Area remains subdued, with GDP growth expected to 0.8% in 2025, supported by the European Central Bank's first-interest rate cuts since 2019 (implemented in June 2024) and stronger domestic demand. However, countries like Germany, France, and Italy continue to struggle due to weak manufacturing performance, whereas Greece and Spain have benefited from robust tourism activity.

In China, growth has held up at a projected 4.0% for CY 2025, supported by targeted stimulus and a gradual recovery in the real estate sector. Growth in the rest of Asia is also benefiting from a revival in global trade and domestic demand. India remains one of the strongest performers globally, with GDP growth forecasted at 6.2% in 2025, supported by robust consumption, capital investment, and favourable demographics.

In Latin America and the Caribbean, growth is more uneven. Larger economies like Brazil and Mexico are seeing moderate expansions, but the overall regional outlook is weaker, with GDP growth forecast at 2.0% in 2025, due to external headwinds, commodity price volatility, and political uncertainty. Meanwhile, Sub-Saharan Africa's growth is expected to slow slightly to 3.8%, as global financial conditions tighten, and oil-exporting nations face declining revenues. The Middle East and North Africa (MENA) region is also seeing tempered prospects, with growth revised down to 2.6%, influenced by lower oil prices and ongoing geopolitical pressures.

Globally, industrial production has remained sluggish through the first half of 2025, constrained by high interest rates, trade fragmentation, and lingering supply chain disruptions. However, a mild recovery is anticipated in the second half of the year as global trade stabilizes and domestic demand for goods strengthens. Central banks in several advanced economies—including the Eurozone, Switzerland, Sweden, and Canada—have begun cutting rates to support demand, though inflation trends remain uneven. Disinflation has progressed slower than expected, particularly in services and wage-heavy sectors, making monetary easing cautious and data-dependent.

Overall, the global economy appears to be stabilizing, but growth in CY 2025 remains below historical averages. Advanced economies continue to grow modestly under the weight of tight policies and weak external demand, while emerging markets, particularly in Asia, show stronger but slowing momentum. The outlook for the remainder of 2025 depends significantly on geopolitical developments, the trajectory of inflation, and the pace of monetary easing.

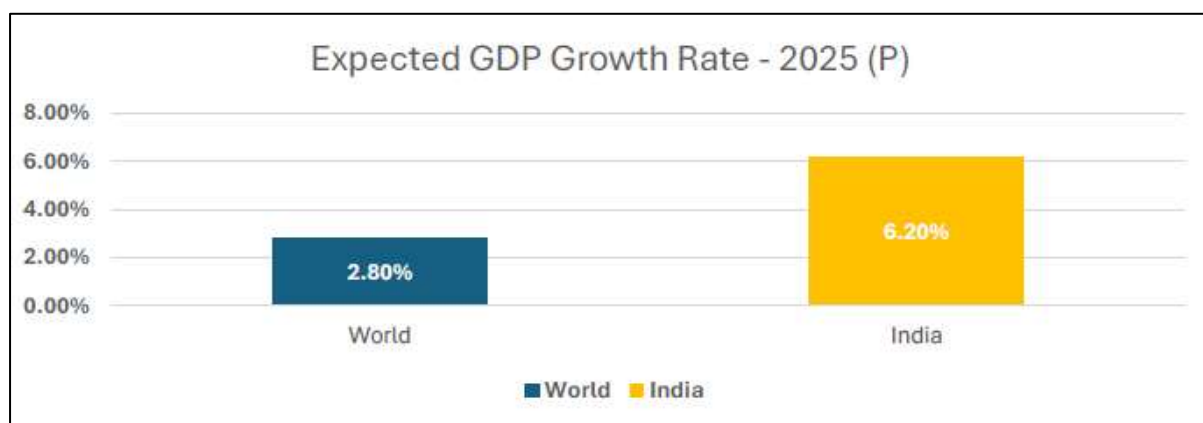

INDIA'S MACROECONOMIC SCENARIO

Gross Domestic Product (GDP)

India Expected to Grow at Twice the Pace of Global Economic Growth

Global and India Growth Outlook Projections (Real GDP growth)

The global economy continues to face persistent challenges, including the lingering effects of the COVID-19 pandemic, heightened geopolitical tensions, and climate-related disruptions that have affected energy and food supply chains. Global real GDP growth is projected at 2.8% in 2025, indicating a moderation in global momentum. In contrast, India's real GDP is projected to grow at 6.2% in 2025, continuing its trend of significantly outpacing global averages and reaffirming its position as the fastest-growing major economy. This implies that India is expected to grow at more than twice the pace of global GDP, supported by strong domestic demand, structural reforms, and increased infrastructure investment. India's resilience among the G20 economies further strengthens its role as a key driver of global economic growth in the coming years.

India and Top 5 Global Economies GDP Growth Forecast

Note: P = Projections, Source: IMF World Economic Outlook April 2025 update.

In September 2024, India achieved a significant milestone by overtaking Japan to become the third most powerful nation in the Asia-Pacific region, as per the Asia Power Index 2024. India's overall score rose to 39.1, reflecting a 2.8-point increase from the previous year, driven by growing influence across economic, military, and diplomatic dimensions.

Key factors behind India's rise include its strong economic performance, expanding and youthful workforce, and increasing strategic engagement across the region. India's Economic Capability improved significantly, supported by its position as the world's third-largest economy in terms of purchasing power parity (PPP). Additionally, a notable increase in its Future Resources score highlights the demographic advantage that is expected to sustain its growth trajectory in the coming years.

INDUSTRY OVERVIEW – SUGAR INDUSTRY

The sugar industry is one of the most significant Agro-based industries in the world, playing a vital role in food security, economic development, and rural livelihoods. At its core, the sector is centred around sugarcane cultivation and processing, with sugar being a universally consumed commodity that sweetens countless food and beverage products across the globe. Beyond its role as a household staple, sugar is a critical input for a wide range of industries, including confectionery, dairy, bakery, pharmaceuticals, and packaged foods.

In India, Brazil, Thailand, and several other countries, the industry has developed into an integrated value chain where sugar production is closely interlinked with the generation of by- products such as ethanol, molasses, bagasse, and press mud, which support renewable energy, distilleries, biofuel blending programs, and fertilizer production.

This diversification has elevated the sector from being a mere sweetener producer to a vital contributor to energy security and sustainability. Globally, sugarcane is among the most cultivated crops, and the industry supports millions of farmers, mill workers, traders, and retailers, making it both a source of livelihood and a driver of regional economies. The industry's dynamics are, however, deeply influenced by fluctuating climatic conditions, government policies on pricing and subsidies, international trade regulations, and changing consumer preferences, particularly with rising health consciousness and debates around sugar consumption. At the same time, new opportunities are emerging in the form of ethanol blending mandates, green energy initiatives, and the development of alternative sweeteners that align with health and sustainability trends.

As nations push for cleaner energy and circular economy practices, the sugar industry is undergoing a profound transformation, positioning itself as not just a supplier of sweeteners but also a provider of renewable energy, eco-friendly materials, and sustainable agricultural practices. In this evolving landscape, the sugar industry stands at the crossroads of tradition and innovation—balancing its centuries-old role as a food essential with its modern identity as a strategic sector that links agriculture, industry, energy, and trade in shaping global economic and social progress.

Global Sugar Production

Source - USDA World Agricultural Supply and Demand Estimates (WASDE)

The global sugar production data from 2019/20 to 2023/24 shows a fluctuating yet slightly declining trend in recent years. Production rose from 166.5 million tonnes in 2019/20 to a peak of 180.9 million tonnes in 2021/22, reflecting an increase in output during this period. However, production has since decreased, reaching 175.7 million tonnes in 2023/24, indicating a modest downward correction. This trend could be influenced by factors such as adverse weather conditions, changes in agricultural practices, or shifts in sugarcane cultivation patterns in major producing countries. Overall, while global sugar production remains high, the slight decline in the last two years suggests potential tightening of supply in the near term.

Major Producing Countries

Countries	2023/24	% of Global Production
Brazil	41.0	23.34%
India	29.5	16.79%
European Union	15.6	8.88%
Thailand	8.8	5.01%
China	10.0	5.69%

Major Trends

- **Rising Global Demand** - Population growth, urbanization, and changing dietary patterns—particularly higher consumption of processed and protein-rich foods—are driving demand for key commodities like cereals, sugar, oilseeds, rice and pulses.
- **Volatility in Prices** - Agro-commodity markets remain highly susceptible to price fluctuations due to weather events, climate change, pest outbreaks, geopolitical tensions, and trade policy shifts. This has increased both risk and opportunity for producers, traders, and investors.
- **Technology Adoption** - Digital agriculture, precision farming, and data-driven supply chain management are being increasingly adopted to optimize yields, reduce input costs, and improve market linkages. Technologies like satellite monitoring, AI-based crop prediction, and smart irrigation are gaining traction.
- **Sustainability and ESG Focus** - Sustainability is becoming central, with greater emphasis on carbon-neutral farming, soil health, water conservation, and responsible sourcing. Consumers and regulators are demanding traceability and environmental compliance across the value chain.

- **Digital Marketplaces and Direct-to-Consumer Models** - Online commodity trading platforms, Agri-fintech, and farm-to-retail models are reducing intermediaries, improving price discovery, and enhancing farmer incomes.
- **Shift Towards Value-Added Products** - There is growing emphasis on processed foods, functional foods, and plant-based products, encouraging Agro-commodity players to move beyond raw produce into higher-margin products.

Indian Sugar Industry

The Indian sugar industry is one of the most prominent Agro-based industries in the country, contributing significantly to rural development, farmer livelihoods, and the broader economy. India is the world's second-largest producer of sugar after Brazil and the largest consumer, reflecting its dual role as both a production powerhouse and a vast domestic market. Centered primarily around sugarcane cultivation, the industry supports more than 50 million farmers and their families, while providing direct and indirect employment to millions through sugar mills, allied industries, and value-added sectors such as ethanol and cogeneration. Beyond sweetening household consumption, sugar is a critical input for confectionery, bakery, beverages, and pharmaceuticals, making it an indispensable commodity in India's food and industrial landscape.

India's sugar profile is shaped by strong regional diversity, with major production concentrated in Uttar Pradesh, Maharashtra, and Karnataka, which together account for more than 80% of the country's output. While the country remains self-sufficient in meeting its domestic sugar demand, its position as a leading exporter has strengthened in recent years due to government-backed policies and surplus production cycles. At the same time, the sector plays a strategic role in India's renewable energy ambitions, with molasses-based ethanol contributing significantly to the ethanol blending program, and bagasse being harnessed for cogeneration of electricity. This integration has positioned the sugar industry as not just a food supplier but also a contributor to energy security and sustainability.

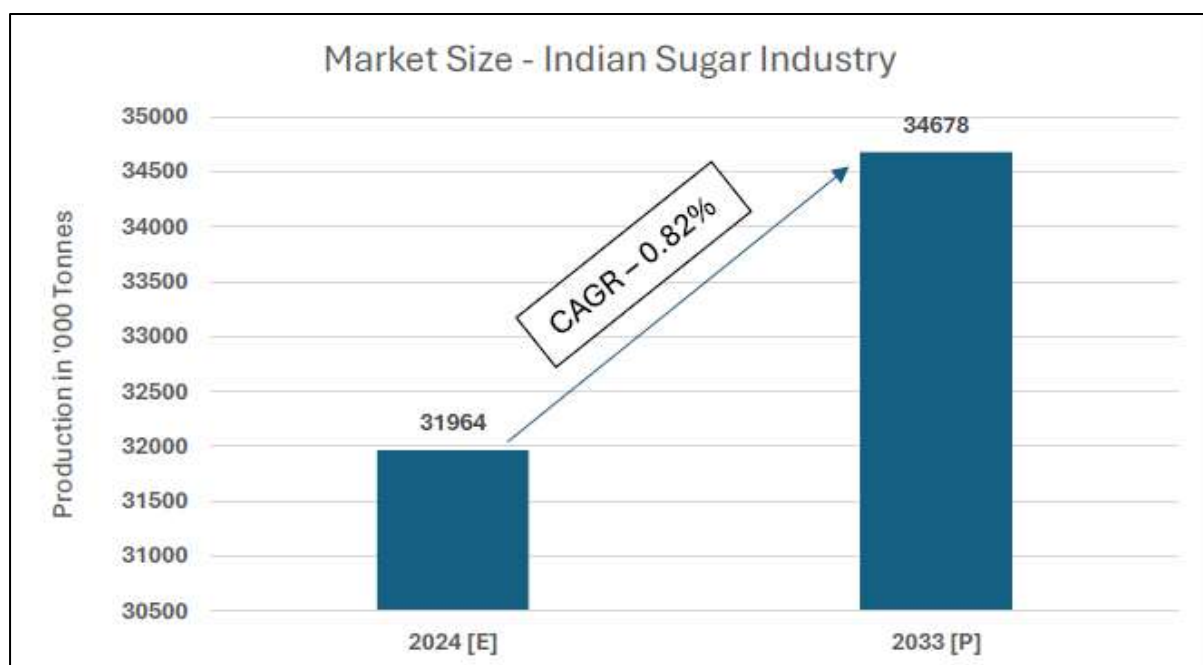

Despite its strong base, the industry faces several structural challenges, including cyclical fluctuations between surplus and deficit years, dependence on monsoon rains, water-intensive cultivation practices, high production costs, and delayed payments to farmers due to pricing mismatches. Additionally, health-conscious shifts in consumer preferences and rising debates around sugar consumption pose long-term demand-side considerations. However, modernization is gradually transforming the industry, with increasing adoption of mechanized farming, improved cane varieties, digital payment systems for farmers, and advanced technologies in milling and ethanol production.

Looking ahead, the Indian sugar industry is poised for a phase of transformation and diversification. With policy support for ethanol blending, increasing investments in bioenergy, and a steady rise in domestic consumption, the sector is expected to remain a critical driver of rural and industrial growth. Balancing the twin goals of supporting farmers and ensuring financial viability of mills will be key, alongside addressing sustainability concerns around water usage and climate change. As India continues to strengthen its role in global sugar trade while integrating deeper into the renewable energy ecosystem, the sugar industry is set to evolve as a sector that bridges tradition and innovation—nourishing people, empowering farmers, and fuelling the nation's clean energy future.

Market Size

The Indian Sugar Industry, based on production data, is estimated at 31,964 thousand tonnes in FY 2024 and is projected to reach 34,678 thousand tonnes by FY 2033 registering a modest CAGR of 0.82% over the period. The production trend has remained relatively stable in recent years, fluctuating between 31,000–36,000 thousand tonnes, highlighting the cyclical nature of sugarcane cultivation and the stabilizing impact of policy interventions. On the demand side, population growth, rising consumption in processed foods and beverages, and continued household use underpin steady domestic demand for sugar.

On the supply side, the industry benefits from India's large-scale cane cultivation, coupled with strong government interventions such as the Fair and Remunerative Price (FRP) policy, ethanol blending programs, and export incentives that ensure stability for farmers and millers alike. However, climate variability, global price volatility, and rising health concerns related to sugar consumption pose ongoing challenges. Despite these factors, sugar production remains strategically important, supporting both domestic food security and India's position as a leading contributor to global sugar trade during surplus years.

Value Chain Structure

- **Sugarcane Cultivation & Harvesting** - Sugarcane cultivation is the foundation of the sugar industry, with farmers planting high-yield varieties and managing irrigation, fertilization, and pest control to maximize sucrose content. Once mature, cane is harvested manually or mechanically, ensuring optimal sugar extraction. Government policies like FRP and SAP safeguard farmer incomes and stabilize the sector.
- **Juice Extraction (Crushing)**- Crushing involves passing shredded cane through multi-stage rollers to extract raw juice. The fibrous residue, bagasse, is collected for use as boiler fuel or cogeneration, contributing to energy self-sufficiency and sustainable by-product utilization.
- **Juice Clarification** - Clarification removes impurities such as soil and fibres from the raw juice, using heat and lime treatment. The resulting sludge is processed into press mud, an organic fertilizer, while the clarified juice proceeds for evaporation and crystallization.
- **Evaporation & Crystallization** - Clarified juice is concentrated in multiple-effect evaporators to increase sugar content, then seeded with crystals in vacuum pans to induce crystallization. This step produces raw sugar crystals and molasses, which contains residual sugars for industrial uses like ethanol production.
- **Centrifugation & Drying** - Centrifugation separates sugar crystals from molasses, and the crystals are dried to produce marketable raw sugar. This step ensures uniform quality, extended shelf life, and suitability for either direct sale or further refining.
- **Refining & Value Addition** - Raw sugar undergoes refining to remove impurities and produce white sugar,

while specialty products like powdered sugar, liquid sugar, and organic sugar cater to diverse industrial and consumer needs. Refining enhances value, stabilizes revenue, and supports downstream industries.

Production of Sugarcane in India

Source – DA&FW

The production data from 2020-21 to 2023-24 shows a generally increasing trend, with some fluctuations. Production rose from 4,053.99 lakh tonnes in 2020-21 to 4,905.33 lakh tonnes in 2022-23, reflecting a steady growth of around 20.9% over two years. However, in 2023-24, production declined slightly to 4,531.58, indicating a reduction of approximately 7.6% from the previous year. This minor dip could be attributed to factors such as adverse weather conditions, crop yield variations, or supply chain challenges. Overall, the data suggests a strong production capacity with periodic fluctuations typical of Agro-based or manufacturing sectors.

State-wise Production of Sugar

Source – CMIE, Infomerics Analytics & Research

The state-wise production data highlights that Maharashtra (34.71%) and Uttar Pradesh (32.58%) dominate the Indian sugar industry, together accounting for over two-thirds of the country's total output. Maharashtra leads due to its large cultivation of high-yield sugarcane varieties and favourable climatic conditions, while Uttar Pradesh benefits from extensive cane acreage and strong farmer participation. Karnataka contributes 16.23%, emerging as the third-largest producer, driven by efficient mills and rising cane productivity. In contrast, Tamil Nadu (3.36%) and Gujarat (2.90%) play relatively smaller roles, constrained by climatic limitations and lower cane availability. The 'Others' category (10.21%) reflects contributions from states like Bihar, Andhra Pradesh, Punjab, and Haryana, which, though smaller in scale, add to the industry's geographic spread. This distribution underscores

the regional concentration of sugar production in a few states, making the industry highly dependent on weather patterns, policy frameworks, and cane pricing in these key regions.

Wholesale & Retail Prices of Sugar

Source – Department of Food and Public Distribution (Directorate of Sugar)

Over the past decade, sugar prices in India have exhibited cyclical fluctuations while maintaining a steady upward trajectory. Wholesale prices moved from ₹33.02/kg in FY 2013-14 to ₹40.64/kg in FY 2023-24, while retail prices increased from ₹35.50/kg to ₹43.73/kg during the same period. The trend reflects the interplay of production cycles, government pricing policies, and market demand-supply dynamics.

Periods of oversupply, such as FY 2014-15, resulted in price corrections, whereas years of lower output, such as FY 2016-17, led to significant price spikes. Despite these variations, the spread between wholesale and retail prices has remained relatively stable at ₹2–3/kg, indicating consistent trade margins across the value chain. The overall upward trajectory underscores the resilience of the sugar sector, supported by steady domestic consumption growth, input cost adjustments, and policy measures including fair and remunerative price (FRP) for sugarcane and the ethanol blending programme. This stability and gradual appreciation in prices highlight the industry's long-term viability and its alignment with both consumer demand and structural reforms in the sector.

Challenges & Threats with Impact Assessment

Despite its strong base and growth potential, the Indian sugar industry faces several structural challenges that affect its stability and long-term sustainability. Below is a detailed analysis of the key restraints and their likely impact over different time horizons:

Threats & Challenges	Impact (1–2 Years)	Impact (3–4 Years)	Impact (5–7 Years)
1. Volatility in Sugarcane Prices and Farmer Arrears	High	High	Medium
2. Overdependence on Monsoon and Climatic Conditions	High	High	High
3. Regulatory and Policy Uncertainty (Export bans, MSP, subsidies)	High	Medium	Medium
4. Rising Input Costs (fertilizers, labour, energy)	High	High	Medium
5. Global Price Fluctuations and Trade Barriers	Medium	High	Medium
6. Health Concerns and Shift Toward Alternatives (jaggery, artificial sweeteners, low-calorie)	Medium	Medium	High

Detailed Overview:

1. **Volatility in Sugarcane Prices and Farmer Arrears** - Sugarcane prices account for a major portion of production costs. Fluctuations in SAP (State-Advised Prices) and FRP (Fair & Remunerative Prices) often create mismatches with sugar realizations, leading to delayed farmer payments and arrears. While government intervention provides temporary relief, the issue remains a persistent structural challenge.
2. **Overdependence on Monsoon and Climatic Conditions** - Sugarcane is a water-intensive crop, making the industry highly dependent on monsoon rains. Erratic rainfall, droughts, or excessive floods can severely affect cane yields and disrupt supply. Climate change has amplified these risks, with rising temperatures and shifting weather patterns impacting both productivity and quality. Unlike some other crops, sugarcane has limited flexibility in terms of crop cycles, which makes weather dependency a persistent long-term challenge.
3. **Regulatory and Policy Uncertainty (Export bans, MSP, subsidies)** - The sugar industry is one of the most regulated sectors in India. Government interventions, such as export bans, export subsidies, stock limits, and

price controls, significantly influence profitability. For example, sudden restrictions on exports to stabilize domestic supply often hurt mills that rely on overseas markets. Similarly, ethanol pricing policies, blending mandates, and subsidy structures are frequently revised, creating uncertainty for long-term planning and investment.

4. **Rising Input Costs (Fertilizers, Labor, Energy)** - The industry faces constant pressure from rising input costs, including fertilizers, fuel, transportation, and labour wages. Energy-intensive operations such as cane crushing and refining amplify the impact of inflation in coal, oil, and electricity prices. Since sugar prices are often regulated or capped, mills find it difficult to pass on these rising costs to consumers, squeezing their margins and affecting profitability.
5. **Global Price Fluctuations and Trade Barriers** - Global sugar markets are highly volatile, influenced by supply-demand dynamics in major producing countries like Brazil, Thailand, and Australia. Indian sugar exports are thus vulnerable to international price swings and trade barriers. Subsidy disputes at the WTO, tariff changes by importing nations, and competition from low-cost producers further add to uncertainties in export-led growth. While India benefits from surplus production in some years, it faces risks when global prices fall below domestic costs of production.
6. **Health Concerns and Shift Toward Alternatives** - Growing awareness about health issues such as obesity, diabetes, and cardiovascular diseases has led to increasing scrutiny of sugar consumption. Both consumers and policymakers are pushing for reduced sugar intake, resulting in rising demand for alternatives like jaggery, stevia, organic sugar, and low-calorie sweeteners. This trend, while gradual, poses a long-term restraint on refined sugar demand, particularly in urban and health-conscious consumer segments. At the same time, taxation on sugary beverages (as seen globally with “sugar taxes”) could further curb demand in downstream industries like soft drinks and confectionery.

GOVERNMENT INITIATIVES AND POLICY SUPPORT

- **Ethanol Blending Program (E20 by 2025-26)** - The Ethanol Blending Program (EBP) has emerged as a game-changer for the Indian sugar industry, with the government advancing the target of 20% ethanol blending with petrol to 2025-26. This initiative creates a steady demand for ethanol produced from sugarcane juice and molasses, enabling mills to divert surplus sugar and stabilize revenues. By mandating Oil Marketing Companies (OMCs) to procure ethanol at remunerative prices, the program ensures predictable income for mills, improves liquidity, and supports timely payments to farmers. Additionally, it helps reduce excess sugar stocks, lowers crude oil import dependence, and contributes to India’s clean energy goals, making ethanol production a crucial growth driver for the sector.
- **Fair and Remunerative Price (FRP)** - The Cabinet Committee on Economic Affairs chaired by Prime Minister Shri Narendra Modi approved the Fair and Remunerative Price (FRP) of sugarcane for Sugar Season 2024-25 at ₹ 340/quintal at sugar recovery rate of 10.25%. This is historic price of sugarcane which is about 8% higher than FRP of sugarcane for current season 2023-24, ensures farmers receive a minimum guaranteed price for sugarcane based on production costs and recovery rates, thereby safeguarding their income.
- **Production & export Subsidies** - The Government of India has historically provided production and export subsidies to stabilize the sugar industry during surplus years. These include support for buffer stock creation, transport, freight, and marketing, enabling mills to export sugar competitively despite higher domestic costs. Such measures help reduce excess inventories, stabilize domestic prices, and ensure timely farmer payments, though they have faced scrutiny under WTO trade rules for impacting global market dynamics.
- **Soft Loans and Financial Assistance to Mills** - In the FY 2024–25, the National Cooperative Development Corporation (NCDC) provided approximately ₹7,618 crore in working capital loans to 46 cooperative sugar

mills in Maharashtra—accounting for the bulk of the ₹7,975 crore disbursed across India that year. These loans, offered at subsidized interest rates, were primarily used to cover day-to-day operations such as sugarcane procurement, salaries, and utilities. Industry experts have raised concerns that while these loans addressed immediate liquidity shortfalls, they were largely not used for capacity expansion or modernization, raising questions about their long-term sustainability

- **National Bio-Energy Policy & Diversification support** - Under the National Bio-Energy Policy, sugar mills are incentivized to diversify beyond sugar by setting up bagasse-based cogeneration plants for renewable power generation and exploring value-added by-products. Support extends to producing bio-CNG, green hydrogen, and specialty chemicals from residues like press mud and molasses, reducing dependence on sugar alone. This diversification not only stabilizes mill revenues and ensures consistent cane demand but also aligns with India's renewable energy and climate goals, positioning the sugar sector as a key player in the country's green energy transition.
- **Export Policy** - In the sugar export policy for SS 2022-23, Government has announced sugar mill wise export quota for all sugar mills in the country with an objective system based on average production of sugar mills in last three years and average sugar production of the country in last 3 years. Further, to expedite the sugar exports and to ensure flexibility to sugar mills in execution of the export quota, mills may decide to surrender the quota partially or fully within 60 days of the date of issue of order OR they can swap the export quota with domestic quota within 60 days. This system would ensure lesser burden on logistics system of the country as swapping system would reduce the need to transport the sugar from distant locations to the ports for exports and movement of sugar across the length and breadth of the country for domestic consumption.
- **Paramparogat Krishi Vikas Yojana (PKVY)** - The Government of India promotes organic and sustainable sugarcane cultivation through schemes like Paramparogat Krishi Vikas Yojana (PKVY), which provides financial support for organic inputs, training, and certification using a cluster-based approach. Farmers receive assistance for obtaining PGS-India and NPOP certification, enabling them to access premium domestic and international markets. With rising global demand, particularly in the EU and US, organic sugar offers India an export opportunity beyond conventional sugar, while sustainable practices like bio-fertilizers, drip irrigation, and waste utilization also improve soil health and resource efficiency. This strategy enhances farmer incomes and positions India as a competitive player in the organic sugar market.
- **Sugar Development Fund** - Sugar Development Fund (SDF) was established in the year 1982, through an act of Parliament. It is being utilized presently to grant loans to the sugar mills for facilitating the rehabilitation and modernization/ Bagasse based co-generation power projects/ production of anhydrous alcohol or ethanol from alcohol/ conversion of existing ethanol plant into Zero Liquid Discharge (ZLD) plant and development of Sugar cane.

COMPETITIVE LANDSCAPE

Key Factors Shaping Competition

- **Digital Supply Chain & Phygital Integration**- Sugar mills are increasingly adopting digital platforms for direct sales, e-auctions, and supply chain management. Integration of ERP, IoT, and blockchain enhances transparency, traceability, and operational efficiency. These technologies allow mills to track sugar quality, optimize logistics, and provide real-time data to buyers, ensuring reliability and trust.
- **Regional Expansion & Rural Sourcing**- With urban markets reaching saturation, mills are focusing on Tier-II, Tier-III, and rural regions for both procurement and distribution. Setting up collection centres, farmer service hubs, and local depots reduces transportation costs, ensures timely supply of sugarcane, and strengthens relationships with growers, which is crucial for operational stability.

- **Direct-to-Consumer (D2C) & Branded Products-** The industry is shifting from bulk B2B supply toward branded and packaged sugar, including organic, low-GI, and specialty sweeteners. Mills are leveraging retail channels and e-commerce platforms to sell directly to consumers, capturing premium segments and building brand loyalty beyond conventional sugar markets.
- **Value-Added Products & By-Product Diversification** - Competition is increasingly influenced by ethanol production, bagasse-based power, bio-CNG, and specialty chemicals. Mills that efficiently utilize by-products generate additional revenue streams, reduce dependency on sugar prices, and secure long-term contracts with industries like oil, energy, and FMCG.
- **Financial Agility & Farmer Payment Systems** - Timely and transparent farmer payments are key competitive differentiators. Mills adopting digital payment systems, crop-linked financing, and partnerships with NBFCs gain trust and loyalty from farmers. Financial efficiency also helps in maintaining cash flow and sustaining operations during periods of sugar price volatility.
- **Sustainability & Brand Differentiation** - Increasing consumer awareness about health and sustainability is driving mills to adopt organic farming, eco-friendly production, and certified quality standards. By highlighting traceability, environmental compliance, and social responsibility, mills can differentiate their products in both domestic and international markets, gaining a competitive edge.

Competitive Strategies

- **Brand Differentiation** - Sugar mills and cooperatives are increasingly leveraging branded and premium sugar products to differentiate themselves in a commoditized market. Packaged, organic, low-GI, and specialty sweeteners allow companies to establish brand equity, build consumer trust, and create emotional connections through certifications, eco-labels, and farm-to-table traceability.
- **Product Innovation & Value-Added Offerings** - Competition is shaped by value-added products and by-products such as ethanol, bio-CNG, specialty chemicals, and bagasse-based power. Mills that innovate in processing techniques, improve sugar purity, or introduce functional sugar variants gain an edge in both domestic and international markets.
- **Technology Integration** - Digital tools and automation are transforming mill operations and sales processes. ERP systems, IoT sensors, AI-driven quality control, and predictive maintenance improve efficiency, optimize energy use, and maintain consistent sugar quality. E-auctions, blockchain-based traceability, and online D2C platforms enhance market transparency and streamline buyer engagement.
- **Pricing & Promotional Strategies** - Mills are adopting dynamic pricing strategies linked to domestic demand, export opportunities, and ethanol incentives. Seasonal promotions, branded packaging, and bulk vs. retail pricing allow companies to appeal to different market segments. Tie-ups with distributors and fintech platforms facilitate easier transactions and financing for bulk buyers and retailers.
- **Localization & Regional Engagement** - To strengthen supply chains and market presence, mills focus on regional procurement and distribution hubs, local farmer engagement programs, and vernacular communication. Tailored solutions in semi-urban and rural areas ensure stronger loyalty from farmers and better penetration in regional markets.
- **Vertical Integration & Diversification** - Modern sugar companies are adopting vertical integration, covering cane procurement, milling, ethanol production, power generation, and retail sugar distribution. This integration streamlines operations, reduces costs, and opens multiple revenue streams beyond sugar, increasing overall competitiveness.

- **Network Expansion & Modernization** - Expansion into Tier-II and Tier-III markets through collection centres, processing units, and retail outlets strengthens market coverage. Modernization efforts, including digital platforms for sales, traceability dashboards, and smart logistics, improve operational efficiency and appeal to tech-savvy buyers and institutional clients.

Barriers to Entry

Key barriers include:

- **High Capital Investment** - Setting up a sugar mill or branded sugar processing unit requires substantial investment in land, machinery, crushing and refining infrastructure, storage, and logistics. Additional costs include working capital for sugarcane procurement, inventory management, energy supply, and by-product processing units (ethanol, cogeneration). This high upfront cost limits entry for small-scale players.
- **Regulatory Compliance and Licensing** - The sugar sector is highly regulated. New entrants must comply with FRP/MSP mandates, state-specific sugar control orders, pollution control norms, and food safety standards. Obtaining licenses for milling, production, exports, and ethanol blending involves complex approvals, which can be time-consuming and costly.
- **Established Brand Loyalty and Market Presence** - Existing mills and cooperatives enjoy strong relationships with farmers, distributors, and institutional buyers. Brand loyalty, trust in product quality, and long-term supply contracts make it difficult for new entrants to secure reliable cane procurement or penetrate retail markets effectively.
- **Thin Margins and Price Volatility** - Sugar prices are highly volatile and influenced by domestic production, global market trends, and government policies. New entrants face financial risk as profitability depends on high throughput, by-product revenue, and efficient cost management. Low margins in raw sugar sales increase pressure on working capital.
- **Technological and Process Requirements** - Modern mills increasingly rely on automation, IoT sensors, ERP systems, and AI-based quality control. Staying competitive requires technical expertise, skilled manpower, and investment in smart manufacturing, which can be a major hurdle for newcomers.
- **Distribution and Supply Chain Expectations** - To compete effectively, mills must develop robust supply chains for sugar, ethanol, and by-products, covering Tier-II and Tier-III regions. Establishing a widespread collection network, logistics infrastructure, and retail reach demands scale, experience, and significant investment, creating a barrier for smaller or new players.

FUTURE OUTLOOK

Sugar Industry

India's sugar industry is poised for steady growth and structural transformation in the coming decade, driven by rising domestic consumption, proactive government policies, technological adoption, and export opportunities. With India being the world's second-largest sugar producer, the sector plays a crucial role in the agricultural economy and rural employment. Increasing focus on sustainable and organic sugar production, alongside value-added products like specialty sugars and beverages, is expected to expand market potential both domestically and internationally.

The Indian Sugar Industry is estimated at 31,964 thousand tonnes in FY 2024 and is projected to reach 34,678 thousand tonnes by FY 2033 registering a modest CAGR of 0.82% over the period. This expansion is driven by

multiple demand-side factors, including population growth, rising disposable incomes, and changing dietary preferences, which are fuelling higher per capita sugar consumption across both urban and rural markets.

The Indian sugar industry is also gradually embracing diversification. Mills are increasingly investing in co-generation plants for bioenergy, producing ethanol and renewable energy from sugarcane by-products, while exploring downstream opportunities such as organic sugar, fortified sugar, and packaged consumer-ready sugar products. This diversification is expected to improve profitability and reduce dependency on commodity price fluctuations.

On the global front, India's sugar exports are expected to rise as the country leverages quality, cost competitiveness, and bilateral trade agreements. Growing demand for sustainable and organic sugar in Europe, North America, and Asia presents new revenue streams. Meanwhile, integration with modern logistics and quick-commerce platforms is enabling packaged sugar brands to reach urban and semi-urban consumers more efficiently.

Overall, the Indian sugar industry is positioned for long-term stability and moderate growth, underpinned by policy support, technological transformation, product innovation, and diversification into energy and value-added sugar products. While challenges such as climate variability, raw material price fluctuations, and international market dynamics remain, proactive measures and investments in modernization are expected to sustain the sector's competitiveness and contribute meaningfully to India's agricultural and industrial growth in the next decade.

Non-Alcoholic Beverage Industry

India's non-alcoholic beverage industry is poised for sustained growth, supported by rising disposable incomes, urbanization, and evolving consumer lifestyles. The sector spans across carbonated drinks, fruit-based beverages, packaged juices, ready-to-drink (RTD) teas and coffees, dairy-based beverages, energy and sports drinks, and functional wellness beverages. With increasing health consciousness, consumers are shifting towards low-sugar, natural, and functional products, while demand for premium and innovative beverages is steadily rising.

The Indian non-alcoholic beverage market, valued at USD 23.51 billion in 2024, is projected to nearly double to USD 46.06 billion by 2033, registering a healthy CAGR of 7.76%. This trajectory reflects both rising consumer demand for branded and healthier options, as well as the industry's expansion into new geographies through enhanced retail penetration, e-commerce, and quick-commerce platforms.

Technology adoption is becoming a defining growth enabler, with companies deploying automation, AI, IoT, and data analytics to enhance production efficiency, ensure quality control, and optimize supply chains. Parallely, digital marketing, influencer-driven campaigns, and direct-to-consumer (D2C) platforms are strengthening consumer engagement and brand loyalty.

Looking ahead, expansion into Tier 2 and Tier 3 cities, continued product innovation (plant-based, functional, and fortified drinks), and strategic collaborations with modern retail and e-commerce players are expected to drive deeper market penetration. While the sector faces challenges such as raw material price fluctuations, climate-related impacts on fruit availability, and intensifying competition, the industry's resilience, coupled with government support through food safety standards and food processing incentives, ensures strong long-term growth prospects. Positioned at the intersection of health, convenience, and lifestyle, the non-alcoholic beverage industry is set to play a pivotal role in shaping India's FMCG landscape over the coming decade.

OVERVIEW

Our Company was originally incorporated as a private limited company in the name of “**Sakuma Exports Private Limited**” under the provisions of the Companies Act, 1956 pursuant to a certificate of incorporation dated February 14, 2005, issue by Assistant Registrar of Companies Maharashtra, Mumbai. Thereafter, the name of our Company was changed from “**Sakuma Exports Private Limited**” to “**C.K.K. Exports Private Limited**” pursuant to a resolution passed in the Extraordinary General Meeting of our Shareholders held on June 29, 2005, and consequently, a fresh Certificate of Incorporation pursuant to such name change was issued on July 14, 2005, by Assistant Registrar of Companies Maharashtra, Mumbai. Subsequently, the name of our Company was further changed from “**C.K.K. Exports Private Limited**” to “**C K K Retail Mart Private Limited**” pursuant to a resolution passed in the Extraordinary General Meeting of our Shareholders held on April 28, 2022. A fresh Certificate of Incorporation pursuant to such name change was issued on June 09, 2022, by the Registrar of Companies, Mumbai bearing Corporate Identification Number U51909MH2005PTC151252. Thereafter, our Company was converted from a private limited company to a public limited company, pursuant to a special resolution passed in the Extraordinary General Meeting of our Shareholders held on September 11, 2023, and consequently, the name of our Company was changed to “**C K K Retail Mart Limited**” by deletion of the word ‘Private’. A fresh Certificate of Incorporation consequent upon conversion from private company to public company dated September 29, 2023, was issued by Registrar of Companies, Mumbai to our Company bearing Corporate Identification Number U51909MH2005PLC151252.

Our Company is engaged in the distribution of packaged products catering to both retail and wholesale businesses. The Company commenced its business operations in the Financial Year 2020–21 and since year 2023, the Company has focused on the distribution and trading of packaged agro-commodities such as sugar, pulses and ghee across regions including Maharashtra, Bihar, West Bengal, and the north-eastern states. In April 2025, our Company expanded the product portfolio with the launch of “**FruitzzzUp**”, a fruit pulp-based juice brand, reinforcing our commitment to offering a diverse and evolving product range that caters to changing consumer preferences. At present, our business primarily involves the distribution of packaged agro-commodities such as sugar, rice, and pulses along with packaged products such as milk powder and soft drinks (carbonated as well as fruit based). In addition to our core business operation, we also occasionally undertakes consultancy assignments.

We have strategically expanded our distribution network through two distinct models:

1. Three-Tier Distribution Model:

In this structure, the Company supplies products to super stockists, who in turn distribute them to distributors. These distributors then supply the products to retailers and wholesalers, ensuring widespread availability across markets. A super-stockist purchases products from the Company on an upfront payment basis, thereby providing immediate cash inflow and reducing our exposure to credit risk. Once goods are procured, the super-stockist is responsible for managing the distribution to distributors, including the collection of payments from them. Super stockists purchase goods at a significant discount which results in a reduced realisation per unit sold and has a direct impact on our gross margins and bottom line. However, this model enables us to reduce our working capital cycle and efficiently handle larger volumes with a lower working capital requirement, as the inventory and receivables risk is partially transferred to the super-stockists.

2. Direct-to-Distributor Model:

In this approach, the Company supplies products directly to distributors, bypassing super stockists. These distributors then deliver the products to retailers and wholesalers, enabling efficient and timely availability to the end consumer.

This expansion has enabled us to access a wider market, strengthen our position in the overall trade and distribution sector. This diversification across multiple segments has enhanced our operational stability, improved risk management and create more sustainable growth opportunities. Through this approach, we successfully built a diversified and balanced business model, supporting consistent growth over the years. However, we do not maintain formal contracts or agreements with our super stockists and distributors for product supply. For details, please refer to “**Risk Factors**” beginning on page 35 of this Draft Red Herring Prospectus.

Recognising the growing demand for convenience and speed, we have also entered the fast-growing quick commerce segment, making our products available on platforms such as Zepto and Blinkit. This initiative has strengthened our digital retail presence and positioned us to meet the increasing consumer demand for faster deliveries.

To ensure food quality and regulatory compliance, our Company is registered and licensed with the Food Safety and Standards Authority of India (FSSAI) under the Food and Drugs Control Administration of Maharashtra.

Well established relationships with our suppliers and wide channel of sales and distribution network

We have developed relationships with our suppliers which gives us a competitive advantage by ensuring efficient and timely sourcing. We believe that this enables us to deliver products to our customers promptly, thereby enhancing the value we provide. Over the years, we have built a distribution network across India. As of March 31, 2025, we had approximately 43 distributors and 14 super stockists. Our distribution network has enabled us to effectively manage our marketing strategies, penetrate new markets, and increase our turnover consistently over time.

Leveraging our market skills and relationships

At the core of our growth strategy is our ability to leverage deep market knowledge and strong industry relationships. This is an ongoing process in our organization and the skills that we impart in our people, gives importance to customers. We aim to enhance the growth by leveraging our relationships and further enhancing customer satisfaction. Our approach focuses on building and nurturing long-term relationships with both new and existing clients. Customer satisfaction remains a top priority, and we are committed to strengthening our market position by exceeding expectations and being responsive to our clients' evolving needs. Looking ahead, we plan to expand our customer base by focusing on timely delivery and strengthening existing relationships. By aligning our operational efficiency with relationship management, we strive to foster loyalty, encourage repeat business, and continue building a strong foundation for future growth.

Diversified products portfolio

Our Company offers a variety of products, including various types of sugar, carbonated beverages, enabling the company to serve a diverse customer base and address a wide range of market needs. This product diversification not only helps the Company cater to various consumer preferences but also strengthens its competitive edge by attracting a broader customer in the market. Furthermore, our procurement team constantly monitors market trends and conducts thorough research on demand patterns. As a result, we are able to swiftly adapt and shift from one product to another, ensuring we effectively meet customer requirements and demands.

OUR STRATEGIES

Expand our current distribution network

We have built a wide network of super stockists and distributors, who actively sell our products. As part of our ongoing business strategy, we are evaluating ways to optimise our distribution structure by reducing our dependence on the super stockist model and expanding distributor network. A shift towards a more direct distribution approach, will allow us to improve operational profitability through better price realisation and greater control over the supply chain. Our strategy includes diversifying and increasing our presence in states such as Delhi, Telangana, Karnataka, Chhattisgarh, and Gujarat in the coming years. Additionally, we plan to sell our products through various online retail platforms to further broaden our reach.

Focus on consistently meeting quality standards

Our Company intends to focus on adhering to the quality standards of the products. Quality of the product is very important for our Company from both customer and end user point of view. Continuous quality review of products and timely corrective measures in case of quality diversion are keys for maintaining quality standards of the products. Providing the desired and good quality products help us in enhancing customer trust and maintaining long term relationships with them.

Building strong relationships with suppliers

Building long-term partnerships with suppliers is essential for ensuring consistent quality and availability of products. By fostering strong, mutually beneficial relationships, we aim to create a reliable supply chain that meets demand efficiently. Additionally, establishing strong relationship with suppliers will enable us to negotiate better pricing and delivery terms, which can significantly improve profitability. These relationships will help Company secure favourable conditions, ensuring a steady flow of high-quality products at competitive prices, ultimately contributing to the businesses long-term success and growth.

Continue to strive for cost efficiency

We will continue to focus on expanding our operations and improving operational effectiveness. Improved operational effectiveness leads to increased sales which allows us to reduce our cost and thereby, increasing our profit margins. We wish to constantly pass such benefit to our customers and increase our efficiency further. We also wish to target economies of scale to gain increased negotiating power on procurement.

Brand building and marketing

Creating a strong brand identity is essential to connect with customers and establish a reputation for quality, reliability, and affordability. By focusing on these key attributes, we aim to build a brand that customers trust and identify with. In addition to strong branding, leveraging digital marketing strategies such as social media and content marketing will help us raise awareness and engage with a wider audience. These strategies will enable us to connect with potential customers, engage with a larger audience and enhance our market presence, ultimately contributing to the growth and success of the brand.

Investing in warehousing infrastructure to strengthen procurement and distribution efficiency

As part of our strategy to enhance supply chain resilience and improve procurement efficiency, we intend to invest in warehousing infrastructure. Our business model requires maintaining adequate inventory levels of raw materials and packaged products to ensure uninterrupted supply throughout the year. This is particularly important given the seasonal nature of agricultural procurement and the inherent price volatility associated with such goods. Warehousing enables us to procure large volumes during harvest periods, build buffer stocks, stabilize prices for our distributors, and meet demand without disruption. Therefore, we are intending to acquire the warehouses in Kolhapur, which will serve as a centralized hub to consolidate supplies from various mills, thereby resulting in improved procurement coordination, reduced handling and logistics costs, and overall operational efficiency.

Geographic and Segment Expansion to Drive Growth and Strengthen Market Position

As part of our growth strategy, we intend to expand our geographic footprint by entering newer markets, with the objective of broadening our customer base, increasing market penetration, and enhancing our competitive positioning. Simultaneously, we are increasing our presence in the soft drinks segment, which represents a growing opportunity within the broader FMCG sector. This dual expansion across both new geographies and product categories is expected to contribute meaningfully to our revenue growth and brand visibility. These initiatives will require incremental working capital to support increased inventory, distribution, and marketing.

Through this integrated expansion strategy, we aim to scale operations, diversify our revenue streams, and capture a larger share of the addressable market over the long term.

PHASED IMPLEMENTATION OF UPI FOR BIDS BY INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued the UPI Circulars in relation to streamlining the process of public offer of, among others, equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for Bids by UPI Bidders through Designated Intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure a complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

1. **Phase I:** This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an Individual Bidder had the option to submit the ASBA Form with any of the Designated Intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public offer closure to listing continue to be 6 (six) Working Days.
2. **Phase II:** This phase has become applicable from July 1, 2019, and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by UPI Bidders through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public offer closure to listing continues to be six Working Days during this phase.
3. **Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023, and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public offer closure to listing has been reduced to three working days. The

Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarifications or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for Bids that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted Bids, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

The Offer will be made under UPI Phase III of the UPI Circulars (on a mandatory basis).

Our Company will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

The processing fees may be released to the remitter banks (SCSBs) only after a Bid cum Application is made by the SCSBs to the BRLM with a copy to the Registrar, and such Bid cum Application shall be made only after (i) unblocking of application amounts for each Bid cum Application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy 1991, the FDI Policy, FEMA and rules and regulations made thereunder. While the Industrial Policy, 1991 prescribes the limits and conditions subject to which Foreign Investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the RBI and Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (“**DPIIT**”).

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT has issued a consolidated FDI Policy, which with effect from October 15, 2020 consolidates and supersedes all previous press notes, press releases, and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government has also enacted Foreign Exchange Management (Non-debt Instruments) Rules, 2019 (“**FEMA Rules**”) and Foreign Exchange Management (Debt Instruments) Regulations, 2019 in supersession of Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017 and the Foreign Exchange Management (Acquisition and Transfer of Immovable Property in India) Regulations, 2018. Consequent to the FEMA Rules, the Reserve Bank of India has issued Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instrument) Regulations, 2019 which governs the mode of payment and reporting requirements for investment in India by a person resident outside India. The FDI Policy will be valid until the DPIIT issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue. For further details, see the chapter titled “*Offer Procedure*” beginning on page 318 of this Draft Red Herring Prospectus.

of Directors and its general body through a resolution and a special resolution, respectively before March 31, 2020. The Indian company which has decreased its aggregate limit to 24% or 49% or 74%, may increase such aggregate limit to 49% or 74% or the sectoral cap or statutory ceiling respectively as deemed fit, with the approval of its Board of Directors and its general body through a resolution and a special resolution, respectively; however, once the aggregate limit has been increased to a higher threshold, the Indian company cannot reduce the same to a lower threshold.
